**Request for Technical Review
Storm Drain Installation, Newbury Street and Hancock Street
Seaport Lofts, Portland, Maine**

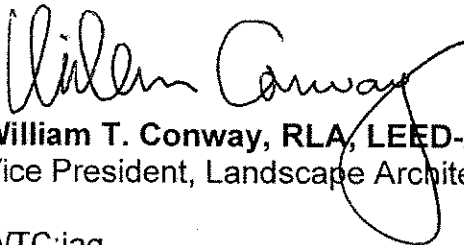

Dear Rico,

As requested by David Margolis – Pineo, we request your review of a proposed storm drain to be installed in Newbury Street and Hancock Street. As depicted on the proposed plans, this storm drain will serve as the storm outfall from Seaport Lofts, a condominium project across Newbury Street from The Bay House. We have received our ability to serve letter from the District, however, David requests your review of this design given the proximity of the storm drain to existing water mains.

If you have any questions please contact our design engineer, Steven Groves at 200- 2064.

Sincerely,

SEBAGO TECHNICS, Inc.
