Hello:

Please find attached an application for building permit and a floor plan for the fit-up of a retail space at 15 Middle Street, Unit NC-3. We will be framing interior non-load bearing walls, adding sheet rock and insulation, providing rough-in as well as finish of plumbing, electrical, acoustical ceiling, and updating existing sprinkler system to code. Additionally, we will be installing the required fire alarm system and HVAC in the space. We would appreciate if you would process this application at your earliest convenience.

Thank you,

Andy Garcia
