ENGINEERING AND PRESERVATION, INC.

61 INDIA STREET, PORTLAND, MAINE

ENGINEER'S FIELD REPORT – 14 November 2007 (Wednesday)

| | | | |
|---------|---|-------------------|--|
| Date | 14 November 2007 | Est. Compl %: | 100% of rebar for placement 100% of subgrade prep |
| Weather | Cloudy 45 degrees at 2:00pm on site 1:30pm – 5:00 pm <input type="checkbox"/> Lightning <input type="checkbox"/> Wind over 14mph <input type="checkbox"/> NWS Weather Advisory | Work in Progress: | Center East Wall Footing Installation |
| Present | Alfred H. Hodson, REP Joe Reynolds, Pearl Properties Rick, Pearl Properties | Subcontractors: | Dragon Concrete (Concrete Supplier) Neil Davis, Summit (Concrete Testing) |

Observations:

| Item # &/or prev. Item # | Observation and Discussion | Relevant Drawing or Spec Section | Action Required |
|-----------------------------------|--|---|-----------------|
| 1114.1 | Viewed installed rebar for the carriage house center-east wall footing. Rebar sizes consisted of #6 bars spaced at approximately 18" on center vertically, with corner bars and #5 cage bars to hold assembly together. Wall was placed on undisturbed subgrade at bottom of existing rubble wall, approximately four feet below finish grade. | | None |
| 1114.2 | Wall dowel bars were not provided, so that new footings could remain independent of existing walls aside from friction. | | None |
| 1114.3 | Concrete was placed and vibrated into position in the wall. 4000 psi mix was provided, with approximately a 6" slump. | | None |
| 1114.4 | Concrete placement concluded at approximately 5:00 p.m. | | None |
| 1114.5 | Total pour for these walls was approximately ten (10) yards. Summit provided testing services for this concrete. | | None |

Please contact me immediately if any items noted here require further clarification.

Respectfully Submitted,

Alfred H. Hodson III, P.E.
