City of Fortland Zoning c/o Mr Ward

In May with the permission of the Fortland city council,
I David Fogg plan to open an antique shop, in the name
of Fogg's Antiques. Featuring everything from vases to
furniture, in addition to some decorative potted plants.
The legal address of this proposed shop is 239 Con ress St.
First floor consists of 432 square feet, two exterior doors,
three windows, smoke alarm, fire extinguisher, and half bath.
The building is owned by anthony S. Fusco of Fortland.
Formally the building housed a laundromat for three years
and for the last five years has been vacant and used for
the owners storage.

This will not be a second-hand junk shop-- it will house disirable, valuable antiques, and hopefully may in some small may improve the neighborhool.

Sincerely yours,

David A. Fogg 15 Edwards Street Fortland, Maine 24122 774-2596

#### Gentlemen:

Reference building located at 239 Congress St., Assessor's plan 21-F-16. Please be advised, Although this building looks precarious, and it has looked this way for the last fifty years. It is structually sound.

when I purchased this building in 1970. I installed a 5x5x24' wooden carrying timber, six 5x5.6' up-right wooden beams and three heavy luty steel jacks.

This was not necessary. It was done as a precaution and to provide protection, against any infringement to the adjacent building.

Sincerly,

ANTHONY (. PUSCO

re: 239 Cur mess St. Assessor's Plan 21\_F-16 March 27, 1973

Anthony Pusco 19 Larch Streat Portland, Maine

The building at the above named address said to be owned by you is leaning against the adjoining property owners this ding causing a dangerous situation.

on inspection, it was noted to be leaning back as well as to one side indicating that this building is structurally unsound.

It is required that the conditions of this building made known to you in this latter be corrected immediately - not later than 10 days, April 12, 1973. please call this office in regard to the action you plan with to take to correct these conditions and to set a drie to meet the take to correct the inside of the buildings an inspector to impact the inside of the buildings.

mig- Irving Tuspector

m/c

April 11, 1973

Mr. Hugh Irving
Dept. of Building Inspection
City of Portland, Paine

Dear Mr. Irving:

Reference your letter dated Parch 27, 1973, concerning 239 Congress St. Flease be advised, a though this building looks precarious, it is structurally sound.

When I purchased this building two years ago, I installed carrying timbers and wooden cellar posts. This was not necessary, it was done to give Le peace of mind.

As an added precaution, and to provide protection against any infringement to the adjacent building, I will install extra carrying timbers and steel jacks.

Very truly yours,

Anthony S. Rusco

#### CITY OF PORTLAND, MAINE MEMORANDUM

Earle S. Smith, Plan Examiner II, Building Inspection Dept. DATE: 5/27/70

FROM:

Charles A. Lane, Assistant Corporation Counsel

SUBJECT:

Sign at the self-service laundromat (Melco Inc.)

I have written to Jacob Levinsky, the apparent owner of the premises to which the sign in question is attached and given him five days to repair the sign or remove it.

Would you please reinspect the premises at that time and advise this office as to whether or not the sign has been either repaired or removed.

Your file is being returned herewith.

Assistant Corporation Counsel

l.:ds Enclosure

7/14/10 - Mahdon.

239 Congress, St.

May 11, 1970

Jacob Levinsky
63 Walcott Street

Dear Mr. Levinsky:

A sign over the public sidwwalk at the Melco Inc. Self-Service Laundromat, which you are reported to own or control has broken plastic faces and pieces are in danger off falling to the sidewalk below. It is necessary that this sign be removed or otherwise made safe.

If this sign has not been removed or repaired (as per Section 205.1 and 206.1.2 of the Portland Building Code) by May 18, 1970 it will be necessary to refer it to the Corporation Counsel of the City of Portland for whatever action he may deem necessary.

Very truly yours,

Plan Examiner II Gueding Inspection

AP 239 Congress St.- Installation of 5 gas-fired clothes dryers for and by Fhilip Lourie in the building of Jacob Levinsky

Jan. 14, 1960

Mr. Philip Kourie 81 Vesper St Mr. Jacob Levinsky 118 Dartmouth St

Gentleren.

Building permit for the above installation is issued to Mr. Lourie, harewith, subject to the following:

The application indicates that the minimum clearance from the sides of the appliances to burnable material to be 12 inches. This is not enough to meet the requirements. Upon talking with Mr. lourie, we find that only one of the minimum is to be close to any burnable material, and that is the end machine against the exterior frame of the wall of the building which is covered on the inside with gypsum wallboard. It appears that the gas flame of the appliance is in a separate chamber at the top of the dryer and that the 12 inches clearance indicated is between this chamber containing the gas burners and the metal encasement of the dryer. To meet he requirements, hr. louris is to set this one dryer so that there will be at least 1-inch between the top of the rachine where the gas burners are 1 located and the surface of the gypsum wallboard on the wood frame wall. This will meet the requirements as to an insulating shield.

It appears that each dryer is to be vented separately, using a Type B gas went through the sidewall of the building into a comparatively narrow space between this building and the masonry building on the next lot, reported to be owned by others. This permit is issued without prejudice to any annoyances or purported nuisances which may arise from encroachment upon the property of others or the discharge of vapor, or the products of combustion over the land of or against the building of others.

Very truly yours,

WHcD:m

Warren McDonald Acting Deputy Insptr. of Bldgs.

P. S. The property is in a B-2 Business Zone under the Zoning Ordinance where use as an automatic laurdry is allowed, but where Sec. 9B of the ordinance provides that "fumes shall not be emitted to an obnoxious or dangerous degree beyond lot boundries". Should such a condition be found, issuance of this building permit will be no defense.

AP-239 Congress Street

Portland Gas Light Co. 5 Temple Street Hr. William Shaw 239 Congress Street

ce to: F.A. Minner Co., Inc. 127 Main Street South Portland, Maine

More information is needed concerning the venting arrangements proposed in exprection with the re-location of one gas-fired clothes proposed in exprection with the re-location of one gra-fired clothes dryer and installation of another one in the first story of the building at the above named location. Venting of the existing dryer, for installation of which we can find no permit in our files, does not installation of which we can find no permit in our files, does not comply in some respects with Building Code requirements. The existing venting as well as any new venting will therefore need to be made to comply with Code requirements.

The vent pipe where located in the same room as the dryers may be of sheet motal as at present as long as it is kept at locate 9 inches below the ceiling. However, where pipe passes through partition and shows and thence through cutside wall, a type B vent is required. This vent should extend through the wall far enough to discharge may from the building. Information indicating compliance with requirements must be furnished before a permit can be insued. 1ssued.

Very truly yours,

Albert J. Scars Inspector of Buildings

AJS/JB

#### APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

Portland, Maine, January 12, 1959

The 4x4 wooden rosts shown in Section 4 are new and they will he secured the better will be secured. The 4x4 wooden posts shown in Section A are new and they will be carried be spaced 5:-0" on centers and the bottoms will be carried the spaced 5:-0" on centers and the bottom at least four inches above the floor on a nedestal of the source at least four inches be spaced 5:-0" on centers and the bottons will be carried above the floor on a pedestal of mason at least four inches above the floor on a pedestal of mason for a cellar is only named to the floor on a pedestal of mason for a cellar is only named to the floor on a pedestal of mason for a cellar is only named to the floor of the above the floor on a pedestal of masonry at least four inch in height. The cellar is only normally damp for a cellar.

The building has been used for a retail store for a long time.
The population proposed will not accommodate norm mannle at one The building has been used for a retail store for a long time.

The occupancy proposed will not accommodate more people at one time then the nateral store namedly would. The nateral store namedly would. The occupancy proposed will not accommedate more people at one time than the retail store normally would. The ratter of future time than the retail store normally would. The ratter of future expansion which was indicated on the drawlings was your who have expansion which was indicated on the drawings was done for purtoses of showing it to the Rendix people in New York who have roses of showing it to the Bendix people in New York who has some say as to how these launderettes are planned. In the some say as to how there Launderettes are planned. In the event that any expansion is rade, it would be necessary to prove that any expansion this would be done.

The entrance door will have a vestibule lockset. The single The entrance door will have a vestibule lockset. The single step down to the public sidewalk exists at the present time step down to the public sidewalk exists at the building was built. sten down to the mublic sidewalk exists at the present time It and has existed from the time that the building was builted and has existed from the time that the street so as not to the street so as and has existed from the time that the building was built. It would be possible to slope the rank to the street so as not to have the clare would be such that th Would be possible to slope the ramp to the street so as not that the situation have the step but the slope would be such that the situation

would be worse than waire the single step.

RECEIVED APR -1 1010 CITY OF POHT ( A.)

#### WADS WORTH, BOSTON & TUTTLE - ARCHITECTS

the operation of the business will be as follows: People will bring bars of laundry to the store, will place it in one of the tachines, and it will be washed in approximately one-half hour's time. Experience has proved that many people take this half hour to do shopping, etc., returning some time after the wash is convleted. In the event that they do not return at the time the wash is completed, the wash is taken from the Fendix by an attendant and placed in a bag. A certain percentage of the people will undoubtedly wait while their wash is being done but with Laximum capacity of rachines the number of recople in the store would be twenty-two. It is extremely unlikely that all rachines will be in use at one time and all of the people waiting to collect their laundry. In fact, waiting space for only six people to wait, hesido the attendant, is indicated.

We have revised the drawing on which application for permit was tesed, showing a section through the front wall and the spacing on the 4x4 posts, and will send you a copy.

In view of the order limiting construction which appeared in the paper yesterday, it is vital that a permit for construction be obtained.

Very truly yours,

WADSWORTH, BOSTON & TUTTLE
