Hello,

Here is my building permit application with electronic floor plans for 163 Cumberland Ave. as requested by Jonathan Rioux (see attachments).

I am re-submitting a revised application with electronic plans because the first submission was returned for being insufficient. When I spoke with staff at the inspections division office I was told that I needed to provide more detail about the header that needs to be re-framed and detail about the type of fire rated entry doors. This additional information is provided on the attached plans.

Please let me know if you have any questions and when I should bring over a check for payment of the application fee.

Thanks,
Ben Chipman
