**Comments:**  
7/25/2006-mjn: Need better specific info regarding the venting, clearabce from cumbustibles, hearth requirements. Lrft <Message w/applicant

Fig.27

## #4 Installing into an existing chimney (US only)

This method provides excellent venting for normal operation. This method also provides natural draft in the event of a power failure. If the chimney condition is questionable you may want to install a liner as in method #7.

Fig.28

## #5 Installing into an existing fireplace chimney (US only)

This method provides excellent venting for normal operation. This method also provides natural draft in the event of a power failure.

The damper area must be sealed with a steel plate or fiberglass. A cap should be installed on the chimney to keep out rain. If the chimney condition is questionable you may want to install a liner all the way to the top as in Method #6.

# Specifications

Weight	350 lbs.
Blower	150 cfm
Hopper Capacity	50 lbs.
Fuel	Wood Pellets
Outside Air Size	2 3/8 inches
Fuse Rating	5 amp
