

Project Description

Planet Fitness

145 Marginal Way

We are seeking a building permit and requesting Fast Track Project permitting for the construction and build out of existing open interior space with a combination of 42" knee walls and 10' walls that will create semi private areas to accommodate 2 hydro massage beds and 2 mechanical massage chairs. The existing area is a stretching room. The new project will consume approximately 20% of the existing room.

We believe this project is eligible for Fast Track Permitting because it is an interior office renovation with no change of use and will not include any expansion, site work, load bearing structural changes and because the project bears the seal of a licensed design professional.

Thank you for your consideration.
