RE: Portland Portable Bathroom – TPI Inspection

Dear Mr. Russell,

My name is Keith Ewing, I am a structural Engineer and my Third Party Inspection number is 204.

I have been asked to perform the Third Party Inspection for container bathroom that the city of Portland has requested be built. I have worked with Snap Space on other projects as the Structural Engineer and Third Party Inspector. I am familiar with their methods and construction practices.

If you have any problems with me doing the Third Party Inspections please let me know.

I was asked to provide References of people that I have worked with as a Third Party Inspector.
