REAS	on for permit: repair after fire				
BUIL	DING OWNER: Merle Clark	<u> </u>			
CONTRACTOR:		APPROVED: 445 47 × 9 × 9 × 2/			
PERM	IT APPLICANT:	DENIED:			
	CONDITION OF APPROVAL OF	R DENIAL			
1.	Before concrete for foundation is placed, and Inspection Services must be obtained. required prior to inspection)				
2.	Precaution must be taken to protect concre	ete from freezing.			
3. It is strongly recommended that a registered land surveyor check all					
	foundation forms before concrete is placed that the proper setbacks are maintained.	d. This is done to verify			
, 4.	All vertical openings shall be enclosed wi	ith construction having a fire			
	rating of at least one(1) hour, including				
5.					
	approved means of egress. A single exit is acceptable when it exits				
	directly from the apartment to the buildir	ng exterior with no			
	communications to other apartment units.				
6.	6. The boiler shall be protected by enclosing with one(1) hour fire-rated				
	construction including fire doors and cei				
	automatic extinguishment. Sprinkler pipi				
	sprinklers may be connected to a domestic				
	capacity sufficient to provide 0.15 gallo of floor throughout the entire area. An				
	shall be installed in an accessible locat				

- the connection to the domestic water supply. Minimum pipe size shall be 3/4 inch copper or 1 inch steel. Maximum coverage area of a residential sprinkler is 144 sq. feet per sprinkler. Every sleeping room below the fourth story in buildings of Use Groups R
- and I-1 shall have at least one operable window or exterior door approved for emergency egress or rescue. 17 The units must be operable from the inside without the use of special knowledge or separate tools. Where windows are provided as means of egress or rescue, they shall have a sill height not more than 44 inches (1118mm) above the floor. All egress or rescue windows from sleeping rooms shall have a minimum net clear opening height dimension of 24 inches (610mm). The minimum net clear opening width dimension shall be 20 inches (508 mm), and a minimum net clear opening of 5.7 sq. feet.
- A portable fire extinguisher shall be located as per NFPA #10. They shall bear the label of an approved agency and be of an approved type.
- All single and multiple station smoke detectors shall be of an approved type and shall be installed in accordance with the provisions of the City's building code Chapter 9, section 19, 919.3.2 (BOCA National Building Code/1993), and NFPA 101 Chapter 18 & 19. (Smoke detectors shall be installed and maintained at the following locations):

- 1. In the immediate vicinity of bedrooms
- 2. In all bedrooms
- 3. In each story within a dwelling unit, including basements In addition to the required AC primary power source, required smoke detectors in occupancies in Use Groups R-2, R-3 and I-1 shall receive power from a battery when the AC primary power source is interrupted.
- 10. Private garages located beneath habitable rooms in occupancies in Use Group R-1, R-2, R-3 or I-1 shall be separated from adjacent interior spaces by fire partitions and floor/ceiling assembly which are constructed with not less than 1-hour fire resisting rating. Private carages attached side-by-side to rooms in the above occupancies shall be completely separated from the interior spaces and the attic area by means of 1/2 inch gypsum board or the equivalent applied to the garage side. (Chapter 4 section 407.0 of the BOCA/1993)
- 11. Guardrail & Handrails-A guardrail system is a system of building components located near the open sides of elevated walking surfaces for the purpose of minimizing the possibility of an accidental fall from the walking surface to the lower level. Minimum height all Use Groups 42", except Use Group R which is 36". In occupancies in Use Group A, B, H-4, I-1, I-2 M and R and public garages and open parking structures, open guards shall have balusters or be of solid material such that a sphere with a diameter of 4" cannot pass through any opening. Guards shall not have an ornamental pattern that would provide a ladder effect.
- 12. All exit signs, lights, and means of egress lighting shall be done in accordance with Chapter 10, section & subsections 1023. & 1024. of the City's building code. (The BOCA National Building Code/1993)
- 13. Stair construction in Use Group R-3 & R-4 is a minimum of 9" tread and 8-1/4" maximum rise. All other Use Group minimum 11" tread, 7" maximum rise.
- 14. Headroom in habitable space is a minimum of 7'6".
- 15. The minimum headroom in all parts of a stairway shall not be less than 80 inches.
- 16. All construction and demolition debris must be disposed at the City's authorized reclamation site. The fee rate is attached. Proof of such disposal must be furnished to the office of Inspection Services before final Certificate of Occupancy is issued or demolition permit is granted.
- Section 25-135 of the Municipal Code for the City of Portland states, "No person or utility shall be granted a permit to excavate or open any street or sidewalk from the time of November 15'of each year to April 15 of the following year".
- The builder of a facility to which Section 4594-C of the Maine State Human Rights Act, Title 5 MRSA refers, shall obtain a certification from a design professional that the plans of the facility meet the standards of construction required by this section. Prior to commencing construction of the facility, the builder shall submit the certification to the Division of Inspection Services.
- This permit does not excuse the applicant from obtaining any license which may be needed from the City Clerk's Office.
