

At Executive Conference Room 217, all enclosing walls will be constructed of movable partitions. The enclosing walls of the adjacent coffee counter will be permanent GWB partitions. Sheet E1.5 revised, issued with ASK 28, shows various data, power, VGA cabling and boxes to be installed on the conference room side of the coffee area partition. Instead, the electrician should leave coils of cable coming through the floor adjacent to the GWB partition so they may be fed into the movable partition when it is installed.
