Jan. 26, 1971

George. Stanford  
191 Spurwink Road  
Scarborough

cc to: Masonic Trustees of Portland  
415 Congress Street

Dear Mr. Stanford:

Where the false partition in office "A" borders the stairwell our inspector reports that the studs are exposed in the stairwell opening. It is our understanding that this partition would be covered on both sides so as to provide a fire resistive wall between office "A" and the stairwell opening.

Very truly yours,

R. Lovell Brown  
Director

MEMORANDUM FROM DEPARTMENT OF BUILDING INSPECTION, PORTLAND, MAINE

October, 1967

Location: 415 Congress St.

Before tanks and piping are covered from view, installer is required to notify the Fire Dept. Headquarters of readiness for inspection and to refrain from covering up until approved by the Fire Dept. Headquarters

These tanks of <sup>(1)</sup>4,900 gallons capacity are required to be of steel or wrought iron no less in thickness than #1" gauge; and before installation are required to be protected against corrosion, even though galvanized, by two coats of tar, asphaltum, or other suitable rust-resisting paint, and special protection wherein corrosive soil such as cinders or the like.

Pipe lines connected to underground tanks, other than tubing and except fill lines and test wells, must be provided with double swing joints arranged to permit the tank to settle without impairing the efficiency of the pipe connections.

Owner and installer will have to bear the responsibility for the structural capacity of the tank to support loads from above such as heavy motor trucks.

If tank will be so located as to be subjected to the action of tide water or "ground" water, adequate anchorage or weighting must be provided to prevent "floating" when tank is empty or nearly so.

The Snack Bar,  
419 Congress Street

Gentlemen:

You are hereby directed to replace the ballcocks in the toilet tanks at your establishment.

These ballcocks are of an illegal construction which can cause a back siphon and contaminate the water supply causing a health hazard and must be replaced with an anti-siphon type ballcock that will be above the overflow tube in the tank.

We will again inspect your establishment on Monday, March 14, 1966 for compliance with this directive.

Very truly yours,

Arnold Goodwin  
Plumbing Inspector
