MEMORANDUM FROM DEPARTMENT OF BUILDING INSPECTION, PORTLAND, MAINE

Installation of Automatic Fire Detection and Alarm System for
Lawrence W. King, 261 Cumberland Street, Portland, Maine 6/21/57

To Owner & Installer:

Presumably this system is being installed under the recent "Safety" Ordinance which is administered by the Chief of the Fire Department. If you have not already done so, I recommend that you consult Fire Department Headquarters as to the areas required to be covered by the detection part of the system, as this office does not know the situation fully at the building and for what reason the system is being installed. Under the new ordinance, as in situations controlled by the Building Code, 3 different arrangements for coverage by detection system are involved:

(1) Where there are two means of egress and the fire alarm system is required to compensate for unsafe relative location of them, areas to be covered by detection system are: Entire basement or cellar and sub-cellar, if any, all public and stair halls, all closets off halls or under stairs, all hazardous rooms and attached garages.

(2) In special cases where only one stairway or means of egress is allowed from second floors more than 13 feet above ground or from any third floor, and the fire alarm system is required to compensate for the emission of the second means of egress, areas required to be covered by the detection system include all of those in (1) and in addition to these areas, all rooms finished or unfinished.

(3) All nursing or convalescent homes or homes for the aged or for children which have wooden frame interior require automatic fire detection and alarm systems with detection system covering all of the areas in (1) and in addition all kitchens.

Application has been made out and the permit is issued to cover situation (1). If you should find out from Fire Headquarters that the situation is other than that and that coverage of detection system is different than that called for in the permit, the installer should file application for amendment to the permit giving the correct situation and coverage for detection system. When system is completed, installer should notify this office for inspection.
