

The stage supplier is: Bronson Stage, PO Box 621, Bangor, ME 04402, richard.b.bronson@hotmail.com, 745-6800. The stage has a deck of 24 feet by 20 feet by 3 feet high +/- a bit due to street elevations. The roof structure has a footprint of 26 feet by 22 feet. The clearance beneath the bottom on the roof and the top of the deck is 9 feet, the roof structure total height to ridge is 15 feet above the street. There are two pairs of stairs and two sound wings (not under the roof) each with a surface of 5 feet by 7 feet, normally set at deck height but that is up to the sound company. There is a solid black front skirt and a black back drop which is tennis court type fabric so that wind will pass through it. This is the same stage that has been used for this event for more than 10 years running.

Let me know if you need anything else!
