Caitlin Cameron:

I want to comment on what is happening to the neighborhood that I live in. (146 Newbury Street). I moved here with idea that I would live in a neighborhood where there were 2-3 story houses. Where there was light and air and sunshine. The proposed construction in this neighbor is too much. Too tall and too dense. If these buildings are allowed to be built it will ruin this neighborhood forever. The traffic from these new constructions will be too many cars for this small street. Does anybody care about quality of life here. I do not want to surrounded by 5-7 story buildings. It is not that kind of a neighborhood despite what the builder say. They will build, get their money and leave us with the mess. It is not right.
