Hello Jason -

I have received approval from Jenn Bartlett at the SFMO to use a UL300a hood for my hostel kitchen (33 Hampshire Street). I am greatly relieved.

So now my next question is -

Do I have to file a separate licensing application for the hood? I looked at some of the city documents and it seems that it is only necessary when having to meet the NFPA 96 guidelines.

Do I have further permits or applications that I must take care of for my UL300a compliant hood?

Please let me know -

Thank you,
Heather Loeber
