

CROSS SECTION W/ FRAMING DETAILS

As bathroom was installed prior to my purchase, I can only go off best observations. Framing appears to be standard 2x4 Pine with studs spaced 16 inches on center. The lower half of the wall adjacent to toilet and sink, as well as entire jetted tub surround, are all 12x12 tile. Dry wall is standard 5/8". There are no structural walls, nor are there any doors - concept is all open. There is an open-spaced door-way entrance as well as an open space window looking out into bedroom loft.
