---

Here is a COMMERCIAL FAST TRACK that Jeanie Bourke has approved for this application process. I didn't realize I had to get a building permit until Electric and Plumbing conversations. The project is not large and there is no load bearing issues in any of the structure layout changes. I am desperate to get this approved quickly because this project needs to be complete by the 1<sup>st</sup> week in May, when my clients and owners of the unit, Robert and Cathy Healy arrive from Florida to live at 99 Silver Street #310. I have spoken to Deb Andrews regarding new window installation by Rich Aluminum. She said she will approve when necessary. I will call to pay the fee over the phone. Please let me know you have received this when you get it. I am very anxious. Thank you so much for your consideration of the permit. If I need anything else, please let me know at your earliest convenience. Thank you so much, Jen
