

Details of Project:

This is a project that has already been completed (7/2011) and I was not aware I needed a permit to do. My condo is currently on the market and has a potential buyer who is asking for the permits done on the fireplace install. The project consisted of replacing a Rinnai gas heater with direct venting to the outside with a Rinnai gas fireplace with direct venting to the outside. It was essentially replacing an old heater with a new one from the same company. I know this application is not eligible to be Fast Tracked, but attention to this permit would be greatly appreciated as my condo is off the market as this permit is being pursued. Thanks!
