Hello,
 Pls see the email below from the sign vendor re: materials and sign attachment.
 Pls let me know if you need anything further to process my application.
 Thank you.
 Brooke

Hey Brooke,
 The materials fro the sign are : MDO (medium destiny overlay), steel angle iron (welded sand powder coated) and the bracket will be attached via masonry anchor bolts.
 Hope thats what they're looking for -
 ~Will

Brooke, just tell your contractor what is required....that's all. They know what is needed. Once they have provided it, we can set the permit in motion. Tell them:
to submit information on the material the sign is made out of and how it is being attached.
