

**Owner's Manual Addendum 12-17-08  
Opposing Airfoil Clamp**

**Objective:**

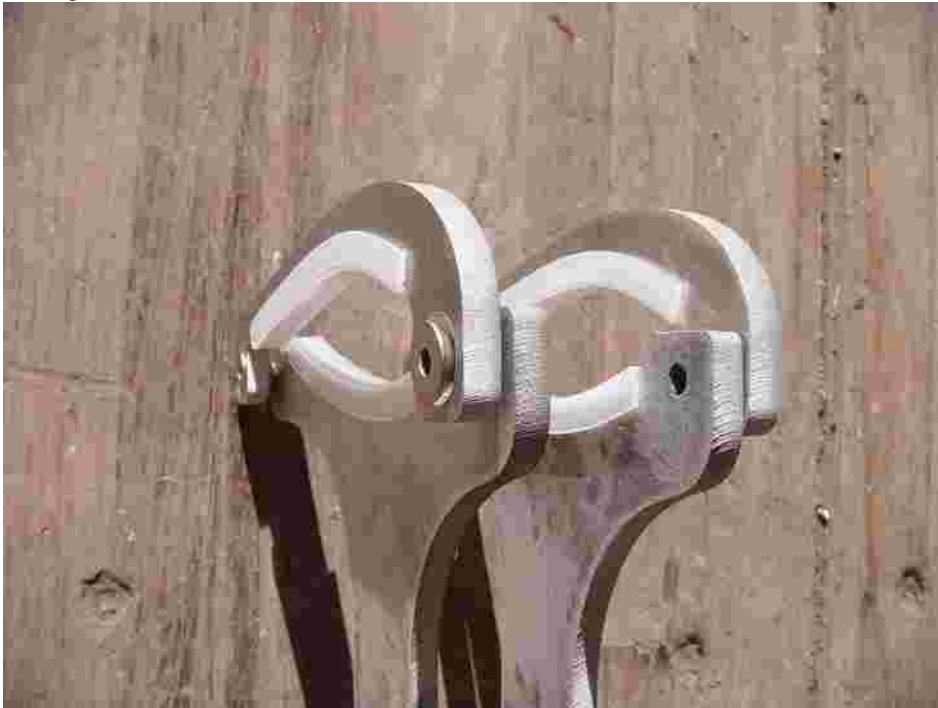

Replace 9 of 18 airfoil clamps with opposed clamps and associated hardware to provide an improved clamping support to the airfoils.

**Contents:**

1. Mark the airfoils with a felt pen at 16 1/8" from the airfoil ends on the non-cambered side. Note that this step replaces step 20 in the Owner's manual.
2. Attach the plastic strips in the manner shown below. Note that for each airfoil assembly, the two different clamp parts shown below will be used.

3. Install the airfoils to the struts in the orientation as in the following picture, with the clamps facing the ends of the airfoils.

4. Follow Step 23 in the Owner's Manual to attach the struts/clamps to the airfoils, and refer to Figures 2-30 through 2-34.

5. The final assembly will be the same as in the following figure:
