Portland, Maine 04101

Dear Jennifer;

The proposed size of the sign that will hang from your building would be 51" wide by 20" tall. It will be constructed out of 3/4" MDO(sign plywood), primed and painted with Matthews polyuethane paint. We will letter the sign with 3M premium vinyl. The sign will be hung from a steel bracket that is also primed and painted with Matthews paint. We will use stainless steel clips to attach the sign to the steel bracket.

We will use 3/8" stainless steel sleeve anchors to mount the steel bracket to the building. We will also attach a 1/4" stainless steel aircraft cable from an attachment on the front of the bracket back to two painted galvanized cleats attached to the building with stainless steel sleeve anchors.

Please call if you have any questions.
