

There would be no
alteration to the
facade, so no Historic
Preservation involvement.
Please call ASA P
as it is cold in our
corridor.

Would like to replace
the stove on application
to an electric like
the attached. These
require no venting
and do not use gas.

Review This Product
Overall Rating: ★★☆☆☆ 2 out of 5
December 10, 2007 By SWFloridaGal from Ft. Myers, Florida (read all my reviews)
"I purchased this stove to use for extra heat in the few weeks of winter that we have here in SW Florida, but mostly for the idea of being able to have a fireplace in my small mobile home...in the heat of summer. Unfortunately, the flames were not what I expected. If I had never seen a really good looking artificial flame, I might have thought it was OK, but since I knew I could get much more realistic flames (for less money) I had to send it back. The stove is really quite impressive looking (since I was looking for a really small stove) and it does not look cheap at all. It is made of metal, and is heavy enough that it looks like it would stand up to alot. Unfortunately, the flames didn't do it for me."
