
9. CONSTRUCTION MANAGEMENT PLAN

The proposed development will be constructed in a single phase. On-site work for this project is anticipated to begin in 2017. All erosion and sediment control measures will be installed prior to any soil disturbance. The contractor will be required to provide safe pedestrian access to the area during construction, specifically along the Middle Street sidewalk and through the Canal Plaza corridor, providing access to the 1, 2, and 3 Canal Plaza Buildings. The contractor will be required to submit a detailed construction management plan for review by the City of Portland prior to the start of construction.
