Dept. of Building Inspections
City of Portland Maine

During a recent inspection in conjunction with a city permit, it was requested by the inspector that Two Monument Square provide the city with information concerning the emergency generator for our life/safety systems. This generator is a diesel generator that serves all emergency lighting, night lighting as well as one elevator. The generator will transfer over to full emergency power after a power loss of 15 seconds. The generator is exercised for 30 minutes each Saturday morning at 6:00 am and is serviced utilizing a yearly maintenance contract.

Should you require any further information, please feel free to contact me.
