CITY OF PORTLAND BUILDING PERMIT

This is to certify that MURRAY W TR FINARD

Located At 1 MONUMENT SQ

Job ID: 2011-10-2521-ALTCOMM

CBL: 032- K-012-001

has permission to replace 12 antennas w/12 new antennas

provided that the person or persons, firm or corporation accepting this permit shall comply with all of the provisions of the Statues of Maine and of the Ordinances of the City of Portland regulating the construction, maintenance and use of the buildings and structures, aud of the application on file in the department.

Notification of inspection and written permission procured before this building or part thereof is lathed or otherwise closed-in. 48 HOUR NOTICE IS REQUIRED.

A final inspection must be completed by owner before this building or part thereof is occupied. If a certificate of occupancy is required, it must be

Fire Prevention Officer

Code Enforcement Officer / Plan Reviewer

THIS CARD MUST BE POSTED ON THE STREET SIDE OF THE PROPERTY
PENALTY FOR REMOVING THIS CARD

BUILDING PERMIT INSPECTION PROCEDURES

Please call 874-8703 or 874-8693 (ONLY)

or email: buildinginspections@portlandmaine.gov

With the issuance of this permit, the owner, builder or their designee is required to provide adequate notice to the city of Portland Inspections Services for the following inspections. Appointments must be requested 48 to 72 hours in advance of the required inspection. The inspection date will need to be confirmed by this office.

- **Please read the conditions of approval that is attached to this permit!! Contact this office if you have any questions.**
- **Permits expire in 6 months. If the project is not started or ceases for 6 months.**
- **If the inspection requirements are not followed as stated below additional fees may be incurred due to the issuance of a "Stop Work Order" and subsequent release to continue.**

Final Inspection required by the designing engineer and the City of Portland.

The project cannot move to the next phase prior to the required inspection and approval to continue, REGARDLESS OF THE NOTICE OF CIRCUMSTANCES.

IF THE PERMIT REQUIRES A CERTIFICATE OF OCCUPANCY, IT MUST BE PAID FOR AND ISSUED TO THE OWNER OR DESIGNEE BEFORE THE SPACE MAY BE OCCUPIED.

Building Permit application

Attached are the documents for a building permit application I am submitted to you. Verizon Wireless is looking to swap existing antennas with new ones located on the rooftop of 1 Monument Sq. No change to antenna location or quantity. Documents attached include... bp application, CCA, Structural, spec sheets for existing and proposed antennas and site drawings. In addition to hard copies of all the attached, I will also have the application fee check in this packet (\$120) when it gets to your office. If you have any questions please feel free to contact me at any time.

Thank You
Kristin

Certificate of Design Application

From Designer:

Hudson Design Group LLC

Date:

8-9-11

Job Name:

Monument Square ME (Verizon Wireless)

Address of Construction:

1 Monument Square, Portland, ME

2003 International Building Code

Construction project was designed to the building code criteria listed below:

Building Code & Year IBC 2009 Use Group Classification (s) Mixed Use - Utility

Type of Construction No Change - Swapping existing antennas for Verizon Wireless

Will the Structure have a Fire suppression system in Accordance with Section 903.3.1 of the 2003 IRC N/A

Is the Structure mixed use? Yes If yes, separated or non separated or non separated (section 302.3) Non-separated

Supervisory alarm System? N/A Geotechnical/Soils report required? (See Section 1802.2) N/A

Structural Design Calculations

N/A Submitted for all structural members (106.1 - 106.11)

Design Loads on Construction Documents (1603)

Uniformly distributed floor live loads (7603.11, 1607)

Floor Area Use	Loads Shown
<u>N/A</u>	<u>N/A</u>

Wind loads (1603.1.4, 1609)

<u>Yes</u>	Design option utilized (1609.1.1, 1609.6)

Accessibility Building Code Certificate

Designer: Daniel P. Hamm, P.E.

Address of Project: 1 Monument Square, Portland, ME

Nature of Project: Antenna modification work to existing
telecommunication site.

The technical submissions covering the proposed construction work as described above have been designed in compliance with applicable referenced standards found in the Maine Human Rights Law and Federal Americans with Disability Act. Residential Buildings with 4 units or more must conform to the Federal Fair Housing Accessibility Standards. Please provide proof of compliance if applicable.

6 Existing to be removed

Vertically Polarized, Panel 80° / 12 dBd

WPA-80080/4CF

When ordering replace "___" with connector type.

Mechanical specifications

Length	1205 mm	47.4 in
Width	285 mm	11.2 in
Depth	114 mm	4.5 in
Depth with z-bracket	154 mm	6.1 in
⁴⁾ Weight	4.5 kg	9.9 lbs
Wind Area		
Fore/Aft	0.36 m ²	3.9 ft ²
Side	0.15 m ²	1.6 ft ²
Rated Wind Velocity (Safety factor 2.0)	>653 km/hr >406 mph	
Wind Load @ 100 mph (161 km/hr)		
Fore/Aft	522 N	117 lbs
Side	233 N	52 lbs

Antenna consisting of aluminum alloy with brass feedlines covered by a UV safe fiberglass radome.

Mounting and Downtilting

Mounting brackets attach to a pipe diameter of Ø50-127 mm (2.0-5.0 in).

Mounting bracket kit #36210002

Downtilt bracket kit #36114003

Electrical specifications

Frequency Range	806-960 MHz
Impedance	50Ω
³⁾ Connector(s)	NE or E-DIN 1 port / center
¹⁾ VSWR	≤ 1.4:1
Polarization	Vertical
¹⁾ Gain	12 dBd
²⁾ Power Rating	500 W
¹⁾ Half Power Angle	
H-Plane	80°
E-Plane	15°
¹⁾ Electrical Downtilt	0°
¹⁾ Null Fill	5-10%
Lightning Protection	Direct Ground

Patented Dipole Design: U.S. Patent No. 6,229,496 B1

- ¹⁾ Typical values.
- ²⁾ Power rating limited by connector only.
- ³⁾ NE indicates an elongated N connector.
E-DIN indicates an elongated DIN connector.
- ⁴⁾ The antenna weight listed above does not include the bracket weight.

Improvements to mechanical and/or electrical performance of the antenna may be made without notice.

Radiation pattern¹⁾

Horizontal

Vertical

Featuring upper side lobe suppression.

Radiation patterns for all antennas are measured with the antenna mounted on a fiberglass pole.

Mounting on a metal pole will typically improve the Front-to-Back ratio.

**Amphenol Antel's
Exclusive 3T (True
Transmission Line
Technology)
Antenna Design:**

- Watercut brass feedline assembly for consistent performance.
- Unique feedline design eliminates the need for conventional solder joints in the signal path.
- A non-collinear system with access to every radiating element for broad bandwidth and superior performance.
- Air as insulation for virtually no internal signal loss.

This Amphenol Antel antenna is under a five-year limited warranty for repair or replacement.

Antenna available with center-fed connector only.

CF Denotes a Center-Fed Connector.

Product Specifications

This specification is PRELIMINARY

LNx-6514DS-VTM

DualPol® Antenna, 698-896 MHz, 65° horizontal beamwidth, RET compatible variable electrical tilt

- Great solution to maximize network coverage and capacity
- Excellent gain, VSWR, front-to-back ratio, and PIM specifications for robust network performance
- Ideal choice for site co-locations and tough zoning restrictions
- Excellent solution for site sharing and maximizing capacity
- Fully compatible with Andrew remote electrical tilt system for greater OpEx savings

CHARACTERISTICS

Antennas Supported on Non-Penetrating Ballasted Sled Mounts

Prepared for:

VERIZON WIRELESS

400 Friberg Parkway
Westborough, MA 01581

Dated:

October 14, 2011

Prepared by:

HUDSON DESIGN GROUP, LLC.

1600 Osgood Street Building 20 North, Suite 2-101
North Andover, MA 01845

Phone: (978) 557-5553

www.hudsondesigngroupllc.com

SCOPE OF WORK:

Hudson Design Group LLC (HDG) has been authorized by Verizon Wireless to conduct a structural evaluation of the structure supporting the proposed Verizon Wireless equipment.

This report represents this office's findings, conclusions and recommendations' pertaining to the support of Verizon's proposed equipment.

This office conducted an on-site visual survey of the above areas on October 5, 2011. Attendees included Sergio Anastacio (HDG-Ass't. Project Manager).

CONCLUSION SUMMARY:

Some building plans were available and obtained for our reference. A limited visual survey of the structure was completed in or near the areas of the Proposed Work. Based on our evaluation, we have determined that, in general, structural designs to support the proposed Verizon Wireless Equipment within or near the Proposed Location can be completed and components installed with **NO STRUCTURAL UPGRADES REQUIRED** to the existing structure.

A summary of the proposed support types and attachment locations are as follows:

(6) DB846F65ZAXY Andrew antennas (2 per sector) (72.0"x10.0"x8.5") (Wt. = 21.0 lbs/each).....Supported by existing non-penetrating roof top sled mounts supported on the existing reinforced concrete roof structure.

(3) LNX-6514DS-VTM Andrew antennas (1 per sector) (72.0"x11.9"x7.1") (Wt. = 33.1 lbs/each).....Supported by existing non-penetrating roof top sled mounts supported on the existing reinforced concrete roof structure.

(3) HBX-6516DS-VTM Andrew antennas (1 per sector) (51.0"x6.5"x3.3") (Wt. = 9.9 lbs/each).....Supported by existing non-penetrating roof top sled mounts supported on the existing reinforced concrete roof structure.

EXISTING ROOF CONSTRUCTION:

The existing roof construction consists of a single-ply EPDM membrane over rigid insulation adhered to a reinforced concrete roof slab supported by a series of reinforced concrete beams and columns.

Antenna SUPPORT RECOMMENDATIONS:

- HDG recommends that the new antennas be supported by the existing non-penetrating ballasted roof top sled mounts supported by the existing reinforced concrete roof structure.

HDG has performed ballast calculations to determine whether or not the existing ballast amount on the sled mount is sufficient enough to support the proposed antenna loading. In conclusion the total required ballast amount for the proposed loading required a total of (25) 8"x8"x16" solid concrete blocks per side which is adequate when compared with the as-built condition. No additional ballast weight is required.

HDG does recommend that ballast tie downs be added to the existing sled mounts to prevent from any ballast blocks being removed.

Referenced documents are attached.

DESIGN CRITERIA:

1. International Building Code- 2009 Edition and ASCE 7-05, Minimum Design Loads for Buildings and Other Structures.

Wind Analysis:

Basic Wind Speed: 110 MPH (includes 3-second gust)
Exposure: C

2. EIA/TIA -222- G Structural Standards for Steel Antenna Towers and Antenna Supporting Structures

County: Cumberland
Wind Load: 100 mph

3. Approximate height above grade to antennas: 152'-0" +/-

PROPOSED ANTENNA SUPPORT LOCATIONS:

Photo 1: Sample photo of the existing Verizon Antennas secured to the existing roof top sled mount.

Photo 2: Sample photo of the existing structure (reinforced concrete beams and columns.)

Proposed Drawings

IF THE PLANS ARE PRINTED 24x36 THE SCALE IS 1:1
IF THE PLANS ARE PRINTED 11x17 THE SCALE IS 1:2

NOTES:
1. REMOVE EXISTING (12) ANTENNAS (4 PER SECTOR).
2. INSTALL (12) NEW MODEL ANTENNAS (4 PER SECTOR) ON EXISTING ANTENNA PIPE MOUNTS.

2.6.8 Design Ice Thickness:

$$t_{iz} = 2.0 * t_i * I * K_{iz} * (K_{zt})^{0.35}$$

$$t_{iz} = 2.33$$

$$K_{iz} = [z/33]^{0.10} \leq 1.4$$

$$K_{iz} = 1.17$$

$$t_i = 1$$

$$I = 1$$

$$K_{iz} = 1.17$$

$$K_{zt} = 1$$

Calculating the weight of ice, the cross-sectional area of ice shall be determined by:

$$A_{iz} = \pi * t_{iz} * (D_c + t_{iz})$$

$$D_c = 72 \text{ (in) Largest Dim of Member}$$

$$A_{iz} = 544.10$$

2.6.9 Design Wind Load:

$$F = q_z * G_h * (EPA's)$$

$$q_z = 0.00256 * K_z * K_{zt} * K_d * V_{max}^2$$

$$q_z = 37.48$$

$$K_z = 1.541$$

$$K_{zt} = 1$$

$$K_d = 0.95$$

$$V_{max} = 100$$

Product Specifications

This specification is PRELIMINARY

LNx-6514DS-VTM

DualPol® Antenna, 698-896 MHz, 65° horizontal beamwidth, RET compatible variable electrical tilt

- Great solution to maximize network coverage and capacity
- Excellent gain, VSWR, front-to-back ratio, and PIM specifications for robust network performance
- Ideal choice for site co-locations and tough zoning restrictions
- Excellent solution for site sharing and maximizing capacity
- Fully compatible with Andrew remote electrical tilt system for greater OpEx savings
