Certification of flammability required for awning/canopy at time	ne of application
UL # required for lighted signs at the time of Final Inspection.	Failure to provide this
formation will invalidate the Sign Permit.	

The Provisions of Section 3102.0 of the City's Building Code "The BOCA National Building Code 1999 edition" shall govern the construction, alteration, repair and maintenance of outdoor signs together with the associated appurtenant and auxiliary devices in respect to structural and fire safety. In accordance to section 3102.4.4 of BOCA construction documents and owners consent is all follows; "Before any permit is issued for the erection of a sign, Construction Documents shall be filed with the code official showing the dimensions, materials and required details of construction, including loads, stresses and anchorage. The applications shall be accompanied by the written contract of the owner or lessees of the premises upon which the sign is to erected. NO PERMIT CAN OR WILL BE ISSUED UNLESS THIS INFORMATION IS SBUMITTED AND APPROVED BY THE INSPECTIONS OFFICE.

ELECTRICAL SIGNAGE PERMITS/RESPONSIBLITIES

All sign companies or any persons engaged in the installation, interchange or maintenance of signage in the City of Portland must have the Electrician or Electrical Contractor who provided power to the sign(s) or associated equipmen: apply for an electrical permit in the Inspections Office.

It is the responsibility of your company to contact your sub-contractor or he owner to inform them of this policy. Whether your company does the final connections, which requires a valid Maine Electricians License or your sub contractor provides this service; permits and inspections shall be required.

Failure to comply with this procedure may result in the denial of sign permits by this office for your company or its representation to install or interchange any future signage in the City of Portland.

A separate sketch may be required if in the Historical District of any proposed sign(s), indicating dimensions, materials, source of illustration and construction method.

Certification

I hereby certify that I am the Owner of record of the named property, or that the owner of record authorizes the proposed work and that I have been authorized by the owner to make this application as his/her authorized agent. I agree to conform to all applicable laws of this jurisdiction. In addition, if a permit for work described in this application is issued, I certify that the Code Official's authorized representative shall have the authority to enter all areas covered by this permit at any reasonable hour to enforce the provisions of the codes applicable to this permit.

Signature of applicant: Date: 12/20/00

Sign Permit Fcc: \$30.00 plus \$0.20 per square foot.'

A building permit is also required for any awning based on cost of work-\$30.00 for the first \$1,000.00 and \$6.00 for each additional \$1,000.00

DATE: 24 January 2001 ADDRESS: 416 Fore 5.7. CBL: 032-N-010 REASON FOR PERMIT: SIDEWALK: A-Frame
BUILDING OWNER: To e Soley
PERMIT APPLICANT: /CONTRACTOR EveryThing Ele. Co.
PERMIT APPLICANT:
The City's Adopted Building Code (The BOCA National Building Code/1999 with City Amendments) The City's Adopted Mechanical Code (The BOCA National Mechanical Code/1993)
CONDITION(S) OF APPROVAL
This permit is being issued with the understanding that the following conditions shall be met: 436 437

1. This permit does not excuse the applicant from meeting applicable State and Federal rules and laws.

Before concrete for foundation is placed, approvals from the Development Review Coordinator and Inspection Services must be obtained. (A
24 hour notice is required prior to inspection) "ALL LOT LINES SHALL BE CLEARLY MARKED BEFORE CALLING."

- 3. Foundation drain shall be placed around the perimeter of a foundation that consists of gravel or crushed stone containing not more than 10 percent material that passes through a No. 4 sieve. The drain shall extend a minimum of 12 inches beyond the outside edge of the footing. The thickness shall be such that the bottom of the drain is not less than 6 inches above the top of the footing. The top of the drain shall be covered with an approved filter membrane material. Where a drain tile or perforated pipe is used, the invert of the pipe or tile shall not be higher than the floor elevation. The top of joints or top of perforations shall be protected with an approved filter membrane material. The pipe or tile shall be placed on not less than 2" of gravel or crushed stone, and shall be covered with not less than 6" of the same material. Section 1813.5.2
- 4. Foundations anchors shall be a minimum of ½" in diameter, 7" into the foundation wall, minimum of 12" from corners of foundation and a maximum 6' O.C. between bolts. Section 2305.17

5. Waterproofing and dampproofing shall be done in accordance with Section 1813.0 of the building code.

6. Precaution must be taken to protect concrete and masonry. Concrete Sections 1908.9-19.8.10/ Masonry Sections 2111.3-2111.4.

- 7. It is strongly recommended that a registered land surveyor check all foundation forms before concrete is placed. This is done to verify that the proper setbacks are maintained.
- 8. Private garages located beneath habitable rooms in occupancies in Use Group R-1, R-2, R-3 or I-1 shall be separated from adjacent interior spaces by fire partitions and floor/ceiling assembly which are constructed with not less than 1-hour fire resisting rating. Private garages attached side-by-side to rooms in the above occupancies shall be completely separated from the interior spaces and the attic area by means of ½ inch gypsum board or the equivalent applied to the garage side. (Chapter 4, Section 407.0 of the BOCA/1999)
- 9. All chimneys and vents shall be installed and maintained as per Chapter 12 of the City's Mechanical Code. (The BOCA National Mechanical Code/1993). Chapter 12 & NFPA 211
- 10. Sound transmission control in residential building shall be done in accordance with Chapter 12, Section 1214.0 of the City's Building Code.
- 11. Guardrails & Handrails: A guardrail system is a system of building components located near the open sides of elevated walking surfaces for the purpose of minimizing the possibility of an accidental fall from the walking surface to the lower level. Minimum height all Use Groups 42". In occupancies in Use Group A, B.H-4, I-1, I-2, M, R, public garages and open parking structures, open guards shall have balusters or be of solid material such that a sphere with a diameter of 4" cannot pass through any opening. Guards shall not have an ornamental pattern that would provide a ladder effect. Handrails shall be a minimum of 34" but not more than 38". Exception: Handrails that form part of a guard shall have a height not less than 36 inches (914 mm) and not more than 42 inches (1067 mm). Handrail grip size shall have a circular cross section with an outside diameter of at least 1 ¼" and not greater than 2". (Sections 1021 & 1022.0). Handrails shall be on both sides of stairway. (Section 1014.7)
- 12. Headroom in habitable space is a minimum of 7'6". (Section 1204.0)
- 13. Stair construction in <u>Use Group R-3 & R-4 is a minimum of 10" tread and 7 %" maximum rise</u>. All other Use Group minimum 11" tread, 7" maximum rise. (Section 1014.0)
- 14. The minimum headroom in all parts of a stairway shall not be less than 80 inches. (6'8") 1014.4
- 15. Every sleeping room below the fourth story in buildings of Use Groups R and I-1 shall have at least one operable window or exterior door approved for emergency egress or rescue. The units must be operable from the inside without the use of special knowledge or separate tools. Where windows are provided as means of egress or rescue they shall have a sill height not more than 44 inches (1118mm) above the floor. All egress or rescue windows from sleeping rooms shall have a minimum net clear opening height dimension of 24 inches (610mm). The minimum net clear opening width dimension shall be 20 inches (508)mm, and a minimum net clear opening of 5.7 sq. ft. (Section 1010.4)
- 16. Each apartment shall have access to two (2) separate, remote and approved means of egress. A single exit is acceptable when it exits directly from the apartment to the building exterior with no communications to other apartment units. (Section 1010.1)
- 17. All vertical openings shall be enclosed with construction having a fire rating of at least one (1) hour, including fire doors with self closure's. (Over 3 stories in height requirements for fire rating is two (2) hours. (Section 710.0)
- 18. The boiler shall be protected by enclosing with (1) hour fire rated construction including fire doors and ceiling, or by providing automatic extinguishment. (Table 302.1.1)

1/2/4

- 19. All single and multiple station smoke detectors shall be of an approved type and shall be installed in accordance with the provisions of the City's Building Code Chapter 9, Section 920.3.2 (BOCA National Building Code/1999), and NFPA 101 Chapter 18 & 19. (Smoke detectors shall be installed and maintained at the following locations):
 - In the immediate vicinity of bedrooms
 - In all bedrooms
 - In each story within a dwelling unit, including basements
- 20. A portable fire extinguisher shall be located as per NFPA #10. They shall bear the label of an approved agency and be of an approved type. (Section 921.0)
- 21. The Fire Alarm System shall be installed and maintained to NFPA #72 Standard.
- 22. The Sprinkler System shall be installed and maintained to NFPA #13 Standard.
- 23. All exit signs, lights and means of egress lighting shall be done in accordance with Chapter 10 Section & Subsections 1023.0 & 1024.0 of the City's Building Code. (The BOCA National Building Code/1999)
- 24. Section 25 135 of the Municipal Code for the City of Portland states, "No person or utility shall be granted a permit to excavate or open any street or sidewalk from the time of November 15 of each year to April 15 of the following year".
- 25. The builder of a facility to which Section 4594-C of the Maine State Human Rights Act Title 5 MRSA refers, shall obtain a certification from a design professional that the plans commencing construction of the facility, the builder shall submit the certification the Division of Inspection Services.
- Ventilation and access shall meet the requirements of Chapter 12 Sections 1210.0 and 1211.0 of the City's Building Code. (Crawl spaces & attics).
- 27. All electrical, plumbing and HVAC permits must be obtained by Master Licensed holders of their trade. No closing in of walls until all electrical (min. 72 hours notice) and plumbing inspections have been done.
- 28. All requirements must be met before a final Certificate of Occupancy is issued.
- 29. All building elements shall meet the fastening schedule as per Table 2305.2 of the City's Building Code (The BOCA National Building Code/1996).
- Ventilation of spaces within a building shall be done in accordance with the City's Mechanical code (The BOCA National Mechanical Code/1993). (Chapter M-16)
- 31. Please read and implement the attached Land Use Zoning report requirements.
- 32. Boring, cutting and notching shall be done in accordance with Sections 2305.3, 2305.3.1, 2305.4.4 and 2305.5.1 of the City's Building Code.
- 33. Bridging shall comply with Section 2305.16.
- 34. Glass and glazing shall meet the requirements of Chapter 24 of the building code. (Safety Glazing Section 2406.0)

35.	All	flashing	shall	comply with	n Section	1406.3.10.

***THIS PERMIT HAS BEEN ISSUED WITH THE UNDERSTANDING THAT ALL THE CONDITIONS OF THE APPROVAL SHALL BE COMPLETED. THEREFORE, BEFORE THE WORK IS COMPLETED A REVISED PLAN OR STATEMENT FROM THE PERMIT HOLDER SHALL BE SUBMITTED TO THIS OFFICE SHOWING OR EXPLAINING THAT THE CONDITIONS HAVE BEEN MET. IF THIS REQUIREMENT IS NOT RECEIVED YOUR CERTIFICATE OF OCCUPANCY SHALL BE WITHHELD. (You Shall Call for Inspections)

****ALL PLANS THAT REQUIRE A PROFESSIONAL DESIGNER'S SEAL, (AS PER SECTION 114.0 OF THE BUILDING CODE) SHALL ALSO BE PRESENTED TO THIS DIVISION ON AUTO CAD LT. 2000, DXF FORMAT OR EQUIVALENT.

Lincoln Center Property Management P.O. Box 7690

Portland, ME 04112

January 18, 2001

City of Portland Attn: Marge Schmuckal, Deb Andrews 389 Congress Street Portland, ME 04101

To Whom It May Concern:

I am writing on behalf of Lincoln Center Property Management, property managers of the commercial space at 416 Fore Street. Allied Resources, Inc. has newly leased and renovated the space as a fine wine and spirits venue. I have seen their proposed layouts for a tasteful neon sign to hang over the sidewalk on Fore Street and for an A-Frame style sidewalk sign for Fore Street. The building ownership has approved the design for both of those signs and they have our permission to proceed as they have planned.

Sincerely,

P.J. Lewis

Lincoln Center Property Management

STANDARDS: SIGNAGE

7

Signage

1. General

Any new sign and any change in the appearance of an existing sign located on Landmark structures or within Historic Districts or Historic Landscape Districts which is readily visible from any street or open space shall not be incongruous to the historic character of the landmark or district and shall further be subject to the following design guidelines.

If there is a conflict between these design guidelines and the requirements of Division 22 of the Land Use Code or other provisions of the City Code, the stricter shall apply.

All such works shall require a Certificate of Appropriateness. Awnings and canopies shall be considered signage and are subject to the applicable provisions of this section.

2. Location and Size of Sign

- a. Signs must not dominate building facades or obscure their architectural features (arches, transom panels, stills, moldings, cornices, windows, etc.).
- b. The size of signs and individual letters should be at an appropriate scale for pedestrians and slowmoving traffic. Projecting signs should not exceed 9 square feet, on first floor level.
- c. Signs on adjacent storefronts should be coordinated in height and proportion. The use of a continuous sign-band extending over adjacent shops within the same building is encouraged, as a unifying element.

- d. Portable signs located on sidewalks, driveways or in parking lots are strongly discouraged, and shall generally be prohibited unless there is no other reasonable means to convey the information (such as on windows, walls or on permanent sign posts).
- e. Wall signs shall generally be located no higher than the window sill line of the second story.
- f. Signs displayed during business hours only, such as those which are removed every evening and displayed again the following morning, constitute an on-going advertising format and shall be construed as being permanent signs rather than temporary signs, if such display continues for more than 30 calendar days.
- g. Signs on residential structures. Signs on residential structures shall be located and sized to be compatible with the character of the district and property.
- h. Off-premise advertising signs shall be prohibited.

6. Other Stylistic Points

- a. The shape of a projecting sign should not be incompatible with the period of the building to which it is affixed, and should harmonize with the lettering and symbols chosen for it.
- b. Brackets should complement the sign design, and not overwhelm or clash with it. They must be adequately engineered to support the intended load, and generally should conform to a 2:3 vertical-horizontal proportion. Screw holes must be drilled at points where the fasteners will enter masonry joints to avoid damaging bricks, etc.

- c. Attachments for all signage and related conduits, etc. shall cause no irreversible drainage to historic building materials.
- d. Neon signs may be permitted in exceptional cases where they are custom-designed to be compatible with the building's historic and architectural character.

Signage/Awnings/Canopies*

1. General

Signs, awnings, canopies and other similar devices are among the most noticeable visual elements of the urban environment. These devices are not only a practical business requirement for a property owner or tenant but also can significantly enhance a storefront, building facade and street environment. Signage designed, constructed, and installed throughout the Downtown should be executed and placed in a manner which is respectful of the character of the building on which it will be located and the character established by surrounding buildings. The context of existing signage to be considered in establishing the appropriateness of a proposed sign will be the character and design of those other existing signs which would meet the guidelines presented herein.

Signs, as components of a building facade, are relatively temporary as businesses or tenants change with some frequency over time. The design and installation of signage should recognize this temporary nature of signage and should always be approached with an attitude of reversibility. All signs should be designed and installed in a manner that upon their removal, the character defining features of the building remain intact and that the exterior materials of the building are not permanently or irreparably damaged.

2. Design

A. General

 The design of signage should be respectful of the building on which it is located, carefully designed to fit a given facade complementing the building's architectural features. Signage inconsistent with the architectural style of a building, such as providing "colonialized" signs on a Victorian storefront, is not appropriate.

- ii. The design of signage should be oriented and scaled to reflect the scale and character of movement of people around the building, with an emphasis primarily on the pedestrian and slow-moving traffic.
- iii. Design, selection of materials, and workmanship shall be of high quality in appearance and character, complementary to the materials and character of the building, and convey a sense of permanence and durability.
- iv. In addition, the design of signage on historic structures should consider historic signage which was previously or is currently incorporated on the building. Where clear documentation exists as to the character and design of original or historically significant signage found on that building, every effort should be made to meet contemporary signage needs with a sign designed in keeping with the building's historic signage.

B. Size

The size of proposed signs should be compatible with the scale of the overall building, with the scale and character of the building's architectural features, and with the character of the specific sign location.

^{*} Editor's Note: The following discussion of Signage/Awnings/Canopies provides further guidance in understanding the intentions of the preservation ordinance signage standard. These guidelines were adopted as a component of the Downtown Pedestrian Activities District and are used informally as a reference by the Historic Preservation Committee (12-1-91).
