Subject: Completion of Special Inspections of the Exterior Wall Renovations at 6 City Center,
Portland, ME

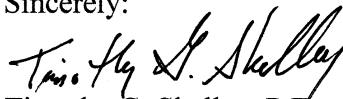

Michael:

The structural modifications required to be made at 6 City Center to allow for the construction of openings in the exterior walls for new windows are complete. I made regular site visits throughout the construction period to inspect the progress on the structural modifications and to verify that they were being constructed according to our structural design documents.

Our findings of the Special Inspections as of this date is that all structural modifications at 6 City Center related to the new exterior wall openings are complete and have been constructed in substantial compliance with the structural design documents for this project.

Please let me know if you have any questions.

Sincerely:

Timothy G. Shelley, P.E.
