Re: 5 Spring St, Portland, ME 04103  
Statement of Special Inspections – Final Report

Dear CEO,

To the best of my information, knowledge and belief, the concrete retaining walls installed as part of this project are constructed in general conformance with the permit structural foundation drawings dated 6-15-17, including known field modifications. All discovered discrepancies known to Associated Design Partners Inc have been documented and resolved. Copies of field construction observation reports, along with concrete and soil compaction testing reports can be provided upon request.

Sincerely,

Aaron S. Wilson, P.E.  
Structural Engineer  
Associated Design Partners, Inc.
