Comments:

06/20/11 After-Fire- Incident- Inspection: Met with Management Team and PIC. All food items contaminated by water suppression system (single head discharge) were thrown-out on site. Advised PIC to clean/ sanitize all effected areas (food and non-food contact surfaces), re-service the sprinkler system and contact their insurance rep. The facility kitchen was temporary shut down by Management with an anticipated re-open date of 06/20/11 (Dinner service). A separate facility (kitchen) in an adjoining building was utilized for cold hold items. Mike Keeley @ (207) 797-3772 from Keeley Electric® responded to evaluate the electrical system affected by the water suppression system. Attached* is a list of items destroyed by management.

Attached* is the report from Dean & Allyn, INC.
