ASBESTOS BUILDING DEMOLITION NOTIFICATION

MAINE DEPARTMENT OF ENVIRONMENTAL PROTECTION
Lead & Asbestos Hazard Prevention Program
17 State House Station, Augusta, Maine 04333

Maine law requires the filing of the ASBESTOS BUILDING DEMOLITION NOTIFICATION with the Department prior to demolition of any building except a single-family home.

Building owners are required to provide this notification of the demolition of a building to the DEP at least 5 working days prior to the demolition. This notification is **not** required before the demolition of a single-family residence or related structure (e.g., garage, shed, barn). It is also **not** required if previous notification of the demolition has been provided to the DEP as part of an asbestos abatement project notification. **Demolition** means the tearing down or intentional burning of a building or part of a building.

Prior to demolition, building owners must determine if there is any asbestos-containing material(s) (ACM) in the building. An "asbestos inspection" by a DEP-licensed Asbestos Consultant is required for all buildings except single-family homes and residential buildings with 2-4 units built after 1980. In lieu of an asbestos inspection, pre-1981 residential buildings with 2-4 units can be surveyed to identify possible ACM by someone knowledgeable about ACM, such as a code enforcement officer or building inspector. If materials that may contain asbestos are found, then you can either assume they are ACM or hire a DEP-licensed Asbestos Consultant to test the materials.

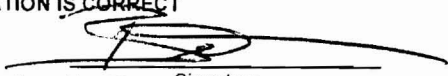

Whenever more than 3 square feet or 3 linear feet of ACM is identified, the ACM must be abated in accordance with the *Maine Asbestos Management Regulations* by a DEP-licensed Asbestos Abatement Contractor. This includes materials presumed to be ACM. Check www.maine.gov for a listing of asbestos contractors.

Prior to issuing a local demolition permit, the DEP requests that **municipalities** have applicants for municipal demolition permits complete this form and fax it to the DEP at 207-287-6220. Municipalities should not issue local demolition permits if the required asbestos inspection or survey has not been performed and identified ACM removed.

Were regulated asbestos-containing building materials found? yes no

Mr. Cassady Pappas
MCDC LLC
cpappas@rupununi.com

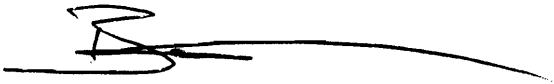

Dear Mr. Pappas;

Abatement Professionals submitted eight (8) individual bulk material samples. Sampling included two (2) separate suspect materials from the 52 Wharf Street Portland Demo job. We sampled the wall system and ceiling system and suspect vinyl tiles beneath the entry way black marble tile, during the demo should additional hidden materials be found work should stop until a determination of the material can be made. Samples were submitted to EMSL Analytical located in Westmont, N.J.

Analysis was conducted under Polarized Light Microscopy, under US EPA 600/R-93/116 appropriate for asbestos analysis. Samples identified with 1% or greater must be treated as asbestos containing materials and fall subject to Federal and State asbestos management regulations. **No Asbestos** was identified in the samples collected.

We appreciate your business. Should you have any questions feel free to contact me at 207-773-1276.

Sincerely,

Bruce M. Hackett
Asbestos Inspector AI-0325

Date Sampled: 11/11/09

Sample Number	Description of Material	Analytical Result (%)
B1A-C	Black Vinyl Tile in entry way	None Detected
B2A-E	Wall and Ceiling Wallboard material	None Detected
