I am currently reviewing your project for verification of compliance with the State of Maine and City of Portland Fire and Life Safety NFPA Codes and need the following information to complete my review:

1. Mark on the floors plans where the proposed wall opening and lift will be.
2. The proposed addition seem to have limited headroom height on the 2nd floor. Please show how good will be moved from the lift area to the second floor. Will personnel need to enter the lift area?
3. Will the new wall openings have door or guards around the openings? Please provide a detail on these.

Please send all revisions to this (my) email and please note that any revisions made to the original pdf files shall maintain the exact file name. Our plan program will automatically assign a version to the revised plans if the file names remain exactly the same as there original submittal name.

Please let me know if you would like to discuss anything or have any questions.

Cc: Asa Gorman <asa.gorman@gmail.com>, Jim DeZutter <jim@thefoodworks.com>, sylvan@thefoodworks.com

Hi Jason,

It's good to hear that the project is moving along in Portland's pipeline! I have cc'd Jim DeZutter to this email who is the project lead and Sylvan Juarez our Architect for any extra help needed. That said, I have attached the updated versions of A1.1 and A1.2 which shows where the lift will be on the floorplan. There will be no humans entering the area where goods are lifted. The materials lift has a platform where goods are placed without humans stepping inside the lift, therefore headroom will be unaffected. I have attached SK1 and SK2 which detail the opening guards. Any details you require on the doors can be answered by Asa Gorman for materials and scope or Sylvan if drawings are required.

Thanks,
Neil
