Tom, we can enter this permit in, however, please review the second page of the fast track permit. It is not signed, and your application is to be reviewed like normally because your plans are not stamped as required.

Good Morning,

Attached is a fast track request, commercial interior permit application and plans for 237 Oxford Street with Owner (Bayside 1 LLC) Listed.

This is an unoccupied space and will remain so until a tenant is found....There is no planned change in use... and space will remain unoccupied until a new tenant renovates the space. We are planning on removing non loadbearing interior partitions to clean up the space and create an open vanilla box for marketing. Electrician will make safe demo the service panel for the space and sprinkler company will locate heads to accommodate an unoccupied open space.

Thank you for your help.

Regards, Tom
