Re: Variance Request – Bayside, 196 Lancaster St, Portland (EL-37364)

Dear Mr. McDuffie:

This is to notify you that as Elevator Inspector of the Elevator and Tramway Safety Program, I have reviewed and approved your variance request for the above location(s):

Reason for Variance: Access panel in machine room.

Deviation: ASME A17.1-2007 Edition, Section 2.8

Reason for Conditions of deviation: Existing building need for access to existing equipment in machine room.

Conditions of deviation:

- 1) Post copy of variance in machine room; and
- 2) Access panel to be labeled to meet building code. ?

Upon satisfactory inspection of the completed installation, a certificate will be issued. An annual inspection shall be made and a certificate issued as long as the equipment is maintained properly and the building's use remains as presented to the Elevator and Tramway Safety Program. If the building's use is changed, this variance will become null and void and another request for a variance will need to be submitted.
