To: Earle S. Smith, Building Inspection Department

DATE: 1-20-75

FROM: John R. Kennedy, Department of Public Works

SUBJECT: Site Plan Review
Consumers Gas and Appliance Company
15 Parris Street (Parking Lor)

1. Parking

Parking for the number of cars as shown on the site plan is inadequate. Research indicates that a total bay width of approximately forty feet is required in order that vehicles may maneuver without having to back into Parris Street. The site plan indicates a total bay width of approximately thirty feet. The applicant should supply actual dimensions of stall size, assle width and angle of parking

2. Curb Cut

Recommend that curb cut be widened to approximately fifteen feet to provide easier access from Parris Street.

JOHN R. KENNFDY CIVIL ENGINEER I

Ward |

SPECIFICATION TO ACCOMPANY APPLICATION FOR PERMIT TO ESTABLISH A TENEMENT

November 19, 1931

- 1. These specifications are to be considered as much a part of the application for the permit as though written upon the application form itself and the owner understands that she is to comply with all the requirements of the Building Code, whether such requirements are specifically mentioned in these specifications or the application
- The ovens of gas ranges in the two apartments to be provided on the second floor will be vented by pipes connecting them with the chimney flues, and any gas hot water heaters which may be provided will be similarly vented.
- 3. The stairs between the cellar and first floor will be fully enclosed with wooden stud partitions covered on both sides with metal lath and plaster, and the under side of the stairs will be covered with similar material in such a manner as to make the enclosure tight except at the door openings. At the foot of the stairs will be provided a metal covered self-closing fire door hung in a metal frame. It is understood that this door and frame are to be covered all over with tin or galvanized iron, and that all joints in the metal are to be locked and made tight; also that the door is to be made self-closing by an approved door check or other approved device, the term self-closing meaning that the door will be normally closed.
- At least three fire extinguishers of an approved type will be provided before the new apartments are occupied, - one in the celler about midway between the heaters, and one in the first story and another in the second story, each to be located in
- 5. The owner understands that both apartments on the second floor are not to be occupied until final inspection has been made, until all of these specifications have been complied with, and until a Certificate of Occupancy has been issued from the Department of Building Inspection covering the use of the second floor.
