Hello,

Here is the estimate for the overhang roof:

I must dig a four feet hole that is eight inches and install a sonotube, pour concrete, 5,000 PSI, put steel bar into the concrete, install a supporting 4'x4' PT post, frame 6'x6', 16" of center, 5/8 CDX plywood, ice water shield, flashing, architectural roofing shingles, the ledge boards will be attached with the ledge screws to the house, includes the joist hanger, and 4'x4' post hanger, also installing the gutters. All exposed boards and the post will be wrapped with white composite boards and the ceiling will be wrapped with the beat boards.

Materials: \$950.00

Labor: \$1,650.00

Total: \$2,600.00

Thank You

Good morning Marco,

Thank you for the sketches. I think you've captured what we're looking for. Would you please quote a price for the job? Also let us know when you could do the job. As discussed we'd like to get the job done in September.

Best regards,

Scott
