Good afternoon Christina

I took most of the morning figuring out the exact green landscaped area all of which are reflected on the 2 attachments

Accordingly to my calculations there are 3582 sf in the lot which translates to 716.4 sf. Calculating all of the green areas we have 972.45 sf from which will be deducted 35.33 sf for the deck which will be hardscaped and not a deck.

I hope this addresses your questions TEB

Thomas Blackburn
