- ① Using existing steel frame to support new sign. Existing frame is about 13' 9" from edge of the road (curb) and about 2" in front of the building and 1" offset from the building corner. Center column is roughly centered (± 90" from outside of corner post to center of center column. Lower cross member of existing frame is about 10' above the ground (varies 3" to 4" due changing ground elevation. The area behind the proposed logo panel is a garden (not walking path)
- ② Inset over main entrance way is approximately 6' 7" in diameter
