*"Fire Protection since 1968"*

To: Portland Fire Dept, Fire Prevention, Building inspections  
From: Brian @ AAA Fire Extinguisher Co.  
Date: March 21, 2017  
Ref: Bayside bowl kitchen appliance suppression system

Dear building inspector,

Bayside Bowl 58 Alder Street, Portland, ME 04101

A food truck trailer on the roof of building is going to be operating and will need a fire suppression system for the hood and appliances.

AAA Fire Extinguisher Company will be installing a wet chemical Amerex 2.75 gallon kitchen fire suppression system to UL300 specifications in the kitchen exhaust hood. The kitchen system will have nozzles protecting the kitchen hood, the duct and appliances. The system will have 2 means of actuation, 1 via manual pull release and the other with fusible links. The appliances will shut down automatically once the system has been actuated.

Schedule of installation will be April 2017

Thank you

Sincerely,

Brian Grondin  
AAA Fire Extinguisher Co., Inc.
