

TO: File - Barking Squirrel Rstnt

DATE: August 19, 1997

FROM: Kevin W Carroll, C E O

SUBJECT: Barking Squirrel Rstnt @ Deering Oaks

At approximately 20:00 hours on August 8, 1997, I received a call from Portland Fire Dispatch that Engine 4 had responded to an alarm at the above-referred location and that there was the possibility of adulterated food product involved.

Upon arrival at the scene, I observed that the dry powder extinguishing system in the kitchen area had completely discharged and had contaminated the entire premises with extinguishing agent.

An inspection revealed that all food containers and all food contact surfaces had been affected.

Following F D A guidelines, I ordered all food and paper products destroyed and all food contact and non-food contact surfaces to be sanitized with an approved sanitizing agent.

As there was going to a problem bringing in a disposal company at that time of night, the restaurant manager made a decision to close and to secure the premises for the night; and to begin clean-up and disposal operations on August 9, 1997, - a.m.

I notified C E O Marland Wing of the facts in this incident and arranged with him to take over this operation on the morning of August 9, 1997.
