The curb ramps reflect what Sashie and I laid out on Friday and the previous site walk with Bob Metcalf.

I am a little curious about what I see as two exterior bike racks behind the building rather than along the street frontage. It's hard to tell where the building entrances are. With 16 interior bike parking spaces, I wonder who these are for and their location. I do see what I think are two bike racks on Cumberland near Mechanic St.

Hi Caitlin

Attached is the 409 plat. It is my understanding that all the conditions of approval have been met. If you give this an OK I will plot a mylar.

Thanks
