

Requested Amendment to Building Permit 2017 – 01730:

Storefront façade changes to 582 Congress (front and rear) and 584 Congress (front – rear already approved)

Please amend the issued building permit to include storefront façade changes as described on the following pages. The proposed changes are intended to be cosmetic and exterior only, with the exception of 584 Congress, where another means of egress will be added.

Please note that the owner of the buildings, Corner Freak LLC, has already appeared before the Historical Preservation Board regarding these changes, and has received approval in principal based on the renderings. Please see Rob Wiener or Deb Andrews for further details.
