

582 Congress (Front)

Existing

The existing façade is not original. It was altered c.1944. I would like to restore it back closer to the original design of John Calvin Stevens, not only for esthetic reasons, but also to reduce problems and risks that I have as a building owner as a result of its current design.

Proposed

- Entry foyer depth reduced to John Calvin Steven's pre-altered
- Left and right window dimensions to be made the same size and restored to larger dimensions
- Original door to be restored and used, if possible
- Materials to be combination of wood and painted black metal

(Note: Signage is for illustration purposes only, and not part of this plan)
