

**To: Fire Chief for the City of Portland**

**I often wonder why the building at 133 Free Street hasn't had any violations ? It has a bar/restaurant on the ground floor with old wiring. There is a junction box by back door. By the ice machine and inside the walk in refrigerator. Why is there. Junction box inside a walk in refrigerator in a cold, moist environment. ?? Isn't that against fire codes ?? There is no sprinkler system in the building for the apartments upstairs or the bar/restaurant ? Doesn't the City care about it's citizens ? The fire on Notes Street was a disaster ! This building at 133 Free Street would be a larger disaster if it ever caught fire. Please do your job and make this property owner do the right thing.**
