Building and Inspection Services Dept.: Plumbing Inspection

June 22, 1978

Mr. David Davidson
Way's Jewelry Store
542 Congress Street
Portland, Me.

Dear Mr. Davidson:

On many occasions, inspections have been made at your place of business and the same violations are found each time.

Although, you have assured us that these conditions will be changed, as yet nothing has been done.

This letter is to inform you of the specific violations and to require from you a statement of your intent to remedy these conditions.

The violations are as follows:

- 1) Exit lights turned off.
- 2) Exit doors locked.
- 3) Aisles blocked.

Your immediate reply is needed in this matter, as the necessary actions will be taken to rectify the conditions.

Sincerely yours,

Lt. James F. Collins
Portland Fire Prevention Bureau
Portland Fire Department

F. W. Cunningham & Sons
Att: Mr. Frank Martz
101 State Street

Dear Mr. Martz:

In reference to your preliminary inquiry for the exits on the proposed F. W. Woolworth revision to their store, two exits are required from the premises such that the methods of exit is not through the premises of another.

Inasmuch as this store is being divided with a different occupant we would require an additional exit in the most remote corner on the Free Street side. This should be recessed in a fashion such that the door will not swing out over the public sidewalk.

Very truly yours,

R. Lovell Brown
Director Building & Inspection Services

137 Preble Street

Gentlemen:

Upon inspection of the above job on December 6, 1960, the following defect was found:

--Anti-panic hardware has not been installed on front door near Oak Street. See our letter to you of July 14th. This anti-panic hardware must have a bar at normal height extending full width of the inside surface of the two doors that will open instantly and without fail by moderate pressure upon them.

It is important that correction of this condition be made before December 27, 1960, and notification be given this office of readiness for another inspection.

If additional information relative to the above is desired, please phone Inspector Allan Soule at 4-8221, extension 234, any week day but Saturday between 8:00 and 9:00 A.M.

Very truly yours,

AAS/jg

A. Allan Soule
Field Inspector

AP-540 Congress Street

July 14, 1960

F. W. Woolworth Co.
639 Massachusetts Avenue
Cambridge 39, Mass.

Gentlemen:

Building permit for alterations to front of store at the above named location in this City is issued herewith based on plans filed with application for permit and your letter of June 22, 1960. Exit hardware on new Congress Street entrances is to be such that both doors of each pair may be opened from the inside, even though locked against entrance from the outside, merely by turning the usual knob or by pressure on a bar or paddle. Anti-panic hardware with bars across both doors is required at least on the opening nearer Oak Street, which serves as a means of egress for the lunch counter. It is necessary that work authorized by this permit be started within three months of the date of its issuance in order to avoid lapsing of the rights granted thereunder.

Very truly yours,

AJS/jg

MR. ALBERT J. SEARS, BUILDING INSPECTOR
CITY OF PORTLAND
CITY HALL, PORTLAND, MAINE

RE: STORE #138 - 540-542 CONGRESS STREET, PORTLAND, MAINE

DEAR MR. SEARS,

ON JUNE 21 WE VISITED YOUR OFFICE AND SPOKE WITH YOU REGARDING CONTEMPLATED ALTERATIONS AT THE ABOVE MENTIONED LOCATION. AT THAT TIME, WE LEFT WITH YOU ONE (1) SET OF PLANS, AND APPLIED FOR A BUILDING PERMIT. AS WE STATED TO YOU, WE CONTEMPLATE STARTING THIS WORK IMMEDIATELY AFTER LABOR DAY, AND WOULD APPRECIATE RECEIVING THE PERMIT SO THAT WE MAY PROCEED WITH ORDERING OF OUR NECESSARY STEEL. YOU REQUESTED THAT WE FORWARD TO YOU SPECIFICATIONS AS TO PROTECTION OF OUR STEEL BEAMS, SO AS TO HAVE A FIRE RESISTANCE RATING OF TWO (2) HOURS. ALL STEEL BEAMS WILL BE INDIVIDUALLY PROTECTED, AS FOLLOWS:

" 1" (MEASURED FROM FACE OF LATH) GYPSUM VERMICULITE PLASTER ON METAL LATH SUPPORTED BY METAL LATH HANGARS. PLASTER MIX; SCRATCH COAT 2 CU. FT. AND BROWN COAT 3 CU. FT. OF U. L. LISTED VERMICULITE TO 100 LBS. OF FIBERED GYPSUM. OTHER DETAILS AS SPECIFIED IN U. L. LISTING, UNDER FLOOR OR ROOF, AND CEILING CONSTRUCTION - DESIGN No. 3-2 HR (BEAM 2HR) - 2 HOURS."

THE ABOVE IS PER THE NATIONAL BOARD OF FIRE UNDERWRITERS - JANUARY 1957.

WITH REFERENCE TO OUR STEEL COLUMNS IN THE BASEMENT, YOU WILL NOTE THAT WE INDICATE FIVE (5) LALLY COLUMNS AND SIX (6) 8" CHANNELS AGAINST THE EXISTING CONCRETE COLUMNS. IN PLACE OF THESE, WE WILL INSTALL A TOTAL OF ELEVEN (11) LALLY COLUMNS. THESE LALLY COLUMNS WILL BE FIREPROOFED, AND WILL BE FURNISHED WITH A DOUBLE SHELL AND A 1" OR MORE ANNULAR SPACE FILLED WITH PERLITE OR VERMICULITE CONCRETE TO PROVIDE THREE (3) HOURS RESISTANCE. THE ABOVE IS THE INFORMATION THAT YOU HAVE REQUESTED.

YOU QUESTIONED OUR SIGN AND WE ADVISED YOU THAT THE SIGN WOULD BE PORCELAIN ENAMEL WITH ILLUMINATED PLASTIC LETTERS. YOU WILL NOTE THIS ON OUR DETAIL "E".

IF WE MAY BE OF FURTHER ASSISTANCE TO YOU, PLEASE ADVISE. OTHERWISE WE WOULD APPRECIATE HEARING FROM YOU AS SOON AS POSSIBLE ON THE ISSUANCE OF THE BUILDING PERMIT.

YOURS VERY TRULY,
F. W. WOOLWORTH CO.

Re: Store #138...540-542 Congress St. Portland, Maine

Dear Mr. Sears:

On June 22, 1960, the writer wrote to you regarding our visit to your office on June 21st, with regard to the contemplated alterations at the above mentioned location.

At that time, one set of plans were left with you, and an application was made out for a building permit.

Our letter of June 22nd indicated the specifications for the protection of our steel beams and columns.

We asked you to advise us as soon as possible on the issuance of the building permit, but to date we have not heard from you.

We would appreciate hearing about this matter as quickly as possible, so that we may schedule our work accordingly, and place orders for the materials necessary.

Thanking you for your kind co-operation, we are,

Yours very truly,
F. W. Woolworth Co.

T. O. Boyd
T. O. BOYD
Asst. Supt. Construction

TOB/11

May 12, 1960

Superintendent of Construction
F. W. Woolworth Company
120 Tremont Street
Boston 8, Massachusetts

Dear Sir:

When a representative of your company was in to talk with me the other day about certain features of the proposed alterations to the store front of the Woolworth Store in this City, the type of hardware required on the new doors was discussed. It was thought at that time that locking hardware on all of the existing doors is operable by paddles or levers. However, inspection of the premises discloses that the front and rear sets of doors in that end of the building where the lunch counter is located are equipped with anti-panic bars across the standing doors at least. This type of hardware is required because the capacity of the lunch counter plus employees is more than 100 persons, which makes it come under requirements of the Public Assembly Ordinance.

Under such circumstances it is necessary that the locking hardware on the new doors at this end of the building be of a similar nature, with operation of the device by which both doors can be simultaneously opened being by means of a bar extending across the door. In other words no change from the existing conditions is allowable as far as locking hardware is concerned.

Very truly yours,

AJS/jg

AP-540 Congress Street, Air conditioning system in Woolworth
Store (owner Henry P. Rines Devs.) by Capitol Engineering Co.

May 24, 1960

Capitol Engineering Co.
c/o F. W. Woolworth Co.
540 Congress Street

cc to: Capitol Engineering Co.
75 Roger Street
Cambridge, Mass.
cc to: F. W. Woolworth Co.
540 Congress Street
cc to: Henry P. Rines, Devs.
157 High Street

Gentlemen:

Building permit for the above system is issued subject to the compliance with standards set up by the Municipal Office in Portland as Pamphlet #90A of the National Fire Protection Association, Standard for the Installation of Air Conditioning and Ventilating Systems—including the provision that any lining of ducts is to be of fire resistive material.

Very truly yours,

WMCD/jg

AP 540 Congress Street
Installation of air-conditioning for F. W. Woolworth Co., by Capitol Engineering Co.

May 12, 1960

Capitol Engineering Company
75 Roger Street
Cambridge, Mass.

cc to: F. W. Woolworth Co.
540 Congress Street

Gentlemen:

If there is any type of mechanical refrigeration equipment to be installed in the above air-conditioning system, Sec. 607 of our Building Code, (copy enclosed) requires that the building permit be approved by the Chief of the Fire Department before issuance. Also, note that he is required to have a plan adequate to show the general location of the system in the building, the location of all shut-offs and emergency valves, the kind of refrigerant, etc.

We, of course, are not experienced in detailed air-conditioning work or refrigeration systems, but a cursory examination of your plan seems to show that shut-off and emergency valves are not shown, nor the kind of refrigerant.

If there is fixed refrigeration equipment of any type in this system, will you be good enough to send us a plan marked up with this necessary information, so that there may not be unnecessary delay in getting the Chief's approval of the permit. As to the separate permit for installation of and structural supports for the cooling tower, the required statement of design is noted signed by Clarence H. Chaisson. Please furnish information to establish Mr. Chaisson's qualifications for structural design, such as a State seal, or similar information.

It is noted that some welding is involved, and it is assumed that his statement of design includes the design of any welded joints. If any of the welding is to be performed in your shop outside of the Portland area, please furnish a written statement that such shop welding has been performed only by welding operators who have effective certification that they are qualified under the rules of test and procedure established by the American Welding Society.

All welding done in the field is required to be done by operators who hold certification from this department, approved not more than one year prior to doing the welding.

Very truly yours,

Warren McDonald
Acting Deputy Insptr. of Bldgs.

157 High Street

Gentlemen:

While we are awaiting the plans showing control valves and emergency shut-offs of the refrigeration part of the air-conditioning system, we are able to issue the permit for the above structural work subject to the following, Mr. Chaisson's seal as a licensed professional engineer in Massachusetts having been found on the plans.

Presumably the cooling tower is designed within itself and is to be fastened to the steel supports in such fashion as to certainly resist wind loads figured at 20 pounds per square foot.

It is noted that all of the steel beams are to be anchored to the existing masonry walls of the building. No doubt, the designer is taking measures to offset expansion and contraction, especially in the long 18-inch beam.

We have been told that all of the structural steel is to be bolted rather than welded.

Very truly yours,

Garren McDonald
Acting Deputy Insptr. of Bldgs.

WMCD:m

Enc: permit card and copy of application

P. S.

We are wondering about the capacity of the bearing plates under the large beam to distribute the loads shown in the diagram, being 3/8" thick. No reason appears why a wider plate or a thicker plate could not be used. If you still intend to use a 3/8" plate with a length 4 1/2 times its width, will Mr. Chaisson be good enough to give his reasoning, not on the bearing area on the wall, but the capacity of such a thin plate to deliver the load to the wall?

APPLICATION FOR PERMIT FOR
HEATING, COOKING OR POWER EQUIPMENT

Portland, Maine, November 4, 1953

RECEIVED
02034
NOV 4 1953
CITY OF PORTLAND

To the INSPECTOR OF BUILDINGS, PORTLAND, MAINE

The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:

Location 542 Congress St. Use of Building Store No. Stories 2 New Building Existing
Name and address of owner of appliance E. W. Woolworth Co., 542 Congress St.
Installer's name and address Harris Oil Co., 202 Commercial St. Telephone 2-8304

General Description of Work

To install oil burning equipment in connection with existing steam heat (conversion)

IF HEATER, OR POWER BOILER

Location of appliance _____ Any burnable material in floor surface or beneath? _____
If so, how protected? _____ Kind of fuel? _____
Minimum distance to burnable material, from top of appliance or casing top of furnace _____
From top of smoke pipe _____ From front of appliance _____ From sides or back of appliance _____
Size of chimney flue _____ Other connections to same flue _____
If gas fired, how vented? _____ Rated maximum demand per hour _____
Will sufficient fresh air be supplied to the appliance to insure proper and safe combustion? _____

IF OIL BURNER

Name and type of burner Silent Glow Labelled by underwriter's laboratories? yes
Will operator be always in attendance? _____ Does oil supply line feed from top or bottom of tank? top
Type of floor beneath burner concrete Size of vent pipe 1 1/2"
Location of oil storage basement (boiler room) Number and capacity of tanks 1-1000 gal. existing
Low water shut off yes Make McDonnell-Miller existing No. 125
Will all tanks be more than five feet from any flame? yes How many tanks enclosed? _____
Total capacity of any existing storage tanks for furnace burners none

IF COOKING APPLIANCE

Location of appliance _____ Any burnable material in floor surface or beneath? _____
If so, how protected? _____ Height of Legs, if any _____
Skirting at bottom of appliance? _____ Distance to combustible material from top of appliance? _____
From front of appliance _____ From sides and back _____ From top of smokepipe _____
Size of chimney flue _____ Other connections to same flue _____
Is hood to be provided? _____ If so, how vented? _____ Forced or gravity? _____
If gas fired, how vented? _____ Rated maximum demand per hour _____

MISCELLANEOUS EQUIPMENT OR SPECIAL INFORMATION

This oil tank formerly used for hot water oil storage in connection with domestic hot water

Amount of fee enclosed? 2.00 (\$2.00 for one heater, etc., 50 cents additional for each additional heater, etc., in same building at same time.)
