Hey Kavya,

The materials are different for the Suite B, made of plywood and luon panels. The 'Saloon' walls were fire retardant drywall and Plywood 2 x 4's.

Maximum group sizes are 10 people per room. With potentially one group waiting to be entered into the next booking, with a slight overlap. So at any time the capacity could be 40 people. Not including staff.

Groups are given a brief instructional talk before being guided into the rooms. This includes how to receive help from the clue masters who are watching and listening to every person and room simultaneously using webcams. The instructional talk also includes information on the exit doors, which are unlocked for the duration of the game.

Does that work? I can add more if you like.

Thanks
Dave

Dave and Susanne,

In addition to the information on what you built the walls out of, we're still interested in a bit of a narrative from you that outlines how many people you allow into a room and how many could be waiting at the same time etc.

Thanks,
Evan

Hi Dave and Susanne,

Wishing you a Happy new year!

Please find the attached pdf copy of the floor plan. I request you to provide the specifications of newly constructed walls (marked in blue) for us to include in the drawings for permitting.

Thank you so much,

Warm regards,

Kavya.
