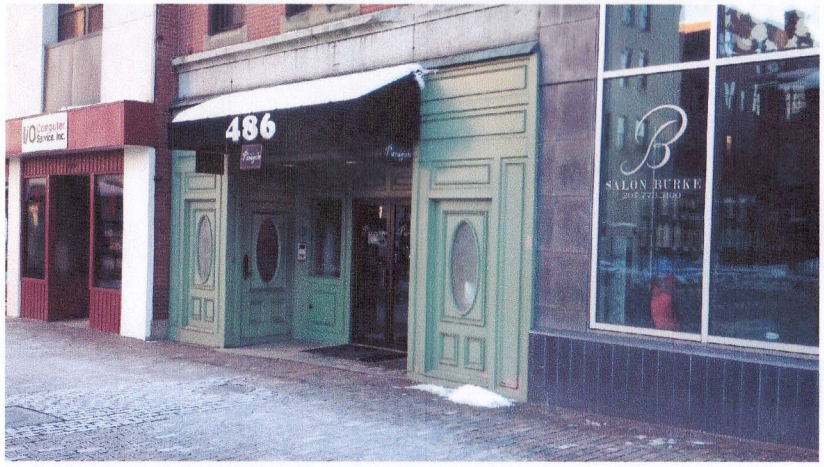
This is the Proposed awning. The only difference being whether we go with a straight edge valance, or a scalloped. That is still to be determined.



Existing Awning

Dimensions of Propoed Awning (approximate):
24' wide x 30" tall x 36" projection.

Frame will consist galvanized steel. Construction method is welded construction. Welds will be brushed, grinded, and painted silver.

Fabric: Sunbrella woven acrylic in customer's choice of pattern (with approval from city). Fabric will be treated to meet FR code.
