ThermI=Block®
THERMAL ENTRANCES
A break from high energy costs!

Tubelite Therml=Block Entrances are designed using the same durable components as our Standard Entrances for outstanding craftsmanship and strength, with the additional benefit of maximum insulating properties. The Medium Stile Door has a face dimension of 4" and is designed for typical commercial use with a greater variety of hardware options. Bottom rail height is 10" for accessibility requirements. Snap-in glass stops provide for 1" glazing thicknesses.

Therml=Block Entrances are furnished with mortised butt hinges, offset pivots or continuous hinges as specified. Standard deadbolt locks, and concealed vertical rod or rim panic exit devices also may be selected. Standard pull handles have been designed for ADA access and have matching push bars.

The Tubelite Therml=Block

Entrances frame has snap-in door stops to conceal frame anchors and provide an excellent weatherseal. Open-back vertical door jambs allow easy, fast assembly with the screw-spline head member. Snap-in

vertical frame closures easily accommodate addition of sidelites and incorporation with thermal storefront framing.
