This is NOT a permit, you may not commence ANY work until the permit is issued. If you are in a Historic District you may be subject to additional permitting and fees with the Planning Department on the 4th floor of City Hall

BUILDING PERMIT INSPECTION PROCEDURES

Please call 874-8703 or 874-8693 to schedule your inspections as agreed upon

Permits expire in 6 months, if the project is not started or ceases for 6 months.

The Owner or their designee is required to notify the inspections office for the following inspections and provide adequate notice. Notice must be called in 48-72 hours in advance in order to schedule an inspection:

By initializing at each inspection time, you are agreeing that you understand the inspection procedure and additional fees from a "Stop Work Order" and "Stop Work Order Release" will be incurred if the procedure is not followed as stated below.

A Pre-construction Meeting will take place upon receipt of your building permit.

- N/A Footing/Building Location Inspection: Prior to pouring concrete
- N/A Re-Bar Schedule Inspection: Prior to pouring concrete
- N/A Foundation Inspection: *wike Collins* Prior to placing ANY backfill
- Framing/Rough Plumbing/Electrical: Prior to any insulating or drywalling
- Final/Certificate of Occupancy: Prior to any occupancy of the structure or use. NOTE: There is a \$75.00 fee per inspection at this point.

Certificate of Occupancy is not required for certain projects. Your inspector can advise you if your project requires a Certificate of Occupancy. All projects DO require a final inspection

If any of the inspections do not occur, the project cannot go on to the next phase, REGARDLESS OF THE NOTICE OR CIRCUMSTANCES.

CERTIFICATE OF OCCUPANICES MUST BE ISSUED AND PAID FOR, BEFORE THE SPACE MAY BE OCCUPIED

REF # 1

FUNCTION: Designed for attaching hanger rod to the top flange of a beam or bar joist, where the flange thickness does not exceed 3/4 inch. The open U design permits rod adjustment. The universal design of the Fig. 350 allows it to be used in an inverted position on the bottom flange of a beam as well.

APPROVALS: Underwriters' Laboratories listed and Factory Mutual approved. Complies with Federal Specification A-A-1192A (Type 19) and Manufacturers' Standardization Society SP-69 (Type 19). When used in an inverted position on the bottom of a beam flange the Fig. 350 also complies with Federal Specification A-A-1192A (Type 23) and Manufacturers' Standardization Society SP-69 (Type 23) (Only for Fig. 350 with locknut).

MATERIAL: Malleable iron with hardened steel cup point set screw

FINISH: Plain or electro-galvanized

ORDERING: Specify rod size, finish and figure number.

Centrifugal In-Line Duct Blowers

Combine centrifugal blower performance with compactness and straight-thru flow characteristics of a vaneaxial fan. Direct-drive blowers have ball bearing motors. Belt-drive blowers have motor cover; ball bearing motor and drive packed separately when blower is ordered complete. All blowers have aerodynamic air straightening vanes and deep-spun, low turbulence inlet cone. Extruded aluminum airfoil wheels.

The centrifugal in-line blowers listed here have four mounting points and we recommend 4 hanger mounted vibration isolators. Blowers Nos. 4C258 thru 3C280 should have 4 No. 4C878 isolators; blower No. 3C281, 4 No. 4C879 isolators. For detailed description of hanger isolators, see Index under Isolators.

Uses: For many types of air supply and exhaust systems as boosters or where conventional blower installation is impractical. Designed for vertical or horizontal mounting.

Dayton Electric Mfg. Co. certifies that the blowers shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

The sound power ratings shown are in decibels referred to 10-13 watt calculated per AMCA Standard 301. The A weighted sound ratings shown have been calculated per AMCA Standard 301. Values shown for blowers are for (inlet Lwi) sound levels for: Installation Type B: free inlet, ducted outlet. Ratings do not include the effects of duct end correction.

No. 3C279

Side angle supports provided for suspension mounting. Removable plate allows access to all moving parts. Housing flanges not supplied.

Aluminum construction for lightweight and structural strength. Air deliveries are based on standard test codes of AMCA.
