

## **SCOPE OF WORK**

### **269 COMMERCIAL STREET, PORTLAND, MAINE 04101 UNIT 4A**

Replace 3 existing window units with 3 new units provided by Marvin Design Gallery (description of window unit located on page 14).

Construct new window R.O. within existing masonry R.O. as per engineered drawings (located on pages 10-13)

Note: This work is non-structural, is limited to window replacement, and will follow all historic guidelines. Over the last several years I have installed 10 identical window units at various locations throughout this building using the same criteria as outlined above.
