

600-604 CONGRESS STREET

10/12/72

CITY OF PORTLAND, MAINE

SUMMARY OF ZONING REQUIREMENTS FOR OFF-STREET PARKING AREAS

A. Parking for Six or Less Vehicles in a Residence Zone.

1. Parking may not be located closer to a street line than the depth of the front yard or that of the side yard on side street required in the zone where located.
2. Parking may not be located closer than 5 feet to a lot line if located closer than 50 feet to any street line.

B. Parking for More Than Six Vehicles in a Residence Zone.

1. If accessory to a non-residential use, it may not be located closer than 25 feet to any residential structures on the adjoining lot.
2. If parking is to be within the area otherwise required to be kept open and unoccupied for front, side and rear yards, the following requirements shall be met:
  - a. Either a continuous guard curb at least six inches in height shall be provided at least five feet from the street and lot lines involved or else a continuous bumper guard not less than twenty inches in height shall be provided inside street or lot lines so that no part of bumpers can project beyond the street or lot lines involved.
  - b. Where parking abuts a lot used for residential purposes or an unoccupied lot in a Residence Zone, a chain link, picket or sapling fence not less than 48 inches high shall be provided along lot lines involved.

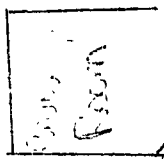

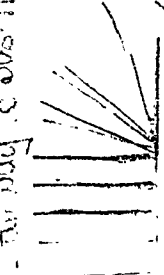

C. Parking for More Than Six Vehicles in Business Zones.

1. Where vehicles are to be parked within ten feet of any street line either a continuous guard curb at least six inches high shall be provided at least five feet from street line or else a continuous bumper guard at least 20 inches high shall be provided in such a location that bumpers of vehicles cannot project beyond the street line.
2. Where parking abuts a lot in a Residence Zone or a lot used for residential purposes a chain link, picket or sapling fence not less than 48 inches high shall be provided along lot lines involved.

D. Parking for More Than Six Vehicles in Any Zone.

1. Driveways from streets or alleys, location and width of which must be approved by the Traffic Engineer, as well as maneuvering areas, shall be provided. If access to parking area is to be available from more than one street, ingress and egress to and from lot shall have the approval of the Planning Board.
2. Surface of driveways, maneuvering areas and parking areas shall be uniformly graded to a depth of at least six inches with gravel or equivalent materials so as to have a wearing surface equivalent in qualities of compaction and durability to fine gravel.
3. A system of drainage shall be provided so that water will not run over or across any public sidewalk or street.
4. If artificial lighting is provided, it must be shaded or screened so that no light source is visible from outside the area and its access driveways.

RE: 604 Congress St.

Dear Mr. Kirchner,

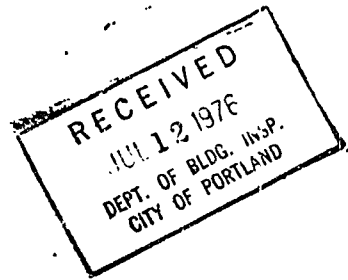

This office is unable to issue a permit to change the use of the above building from bookstore to beauty salon with alterations to the balcony as per plans until such time that you have submitted a structural plan of the balcony showing how it is to be constructed and how it is to be supported. We need to know the size of the sills and the floor timbers as well as how the new addition is to be supported on the building.

When this information has been provided, we will then be in a position to issue a permit.

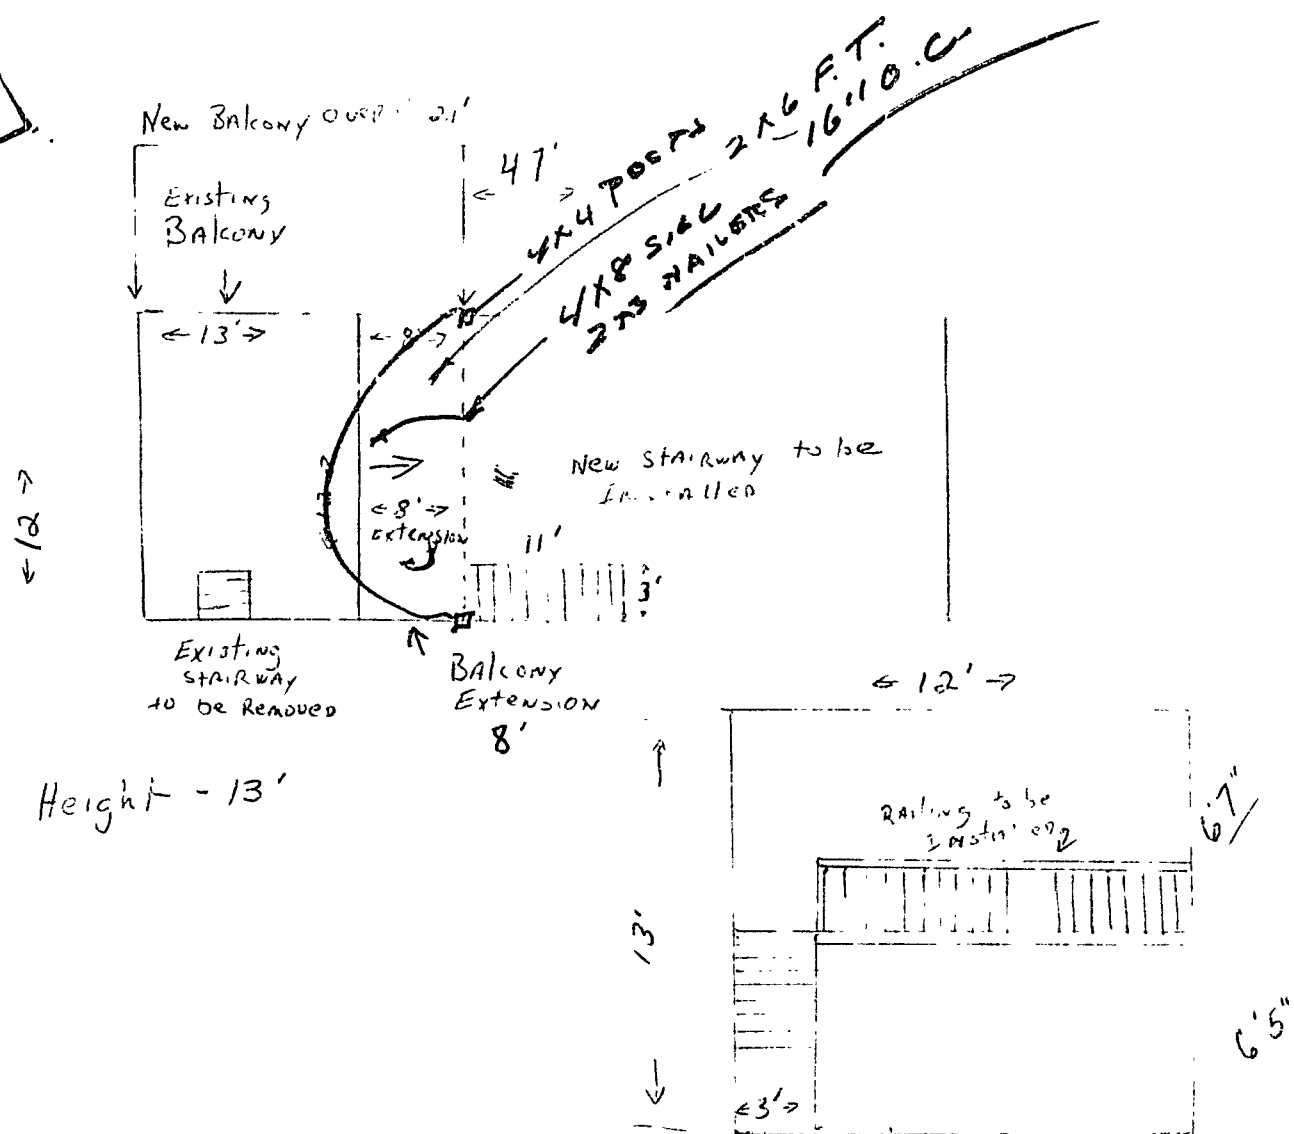

Very truly yours,

Gentlemen:

Permit to change use of first floor from "typewriter shop" to optical office with alterations is being issued subject to the following requirements of the Building Code:

1. The new store front is limited to 600 Congress Street, and does not include the section on the corner of Congress and High Streets.
2. If the occupancy is to be over 20 persons in either section, then vestibule latch sets will be required on all entrance doors. The function of this lockset is such that a person can always get out from the inside of the building by turning the usual door knob or by pressing on a thumb latch without any other locking device on the door.
3. The brick veneer on the front of the building will need to be tied to the building by metal wall ties spaced not more than 16 inches on centers at every fifth course of brick. Ties shall be crimped or corrugated galvanized metal weighing 48 pounds per thousand for a 7/8 inch wide tie, 7 inches long or a 22 gauge tie of the same size. Use of two ties nested one on top of the other at each location is required. Single 16 gauge ties may be used.

Very truly yours,

A. Allan Koule  
Assistant Director of Building Inspection
